***Lewis, Mesolithic to Modern:
A study of site, settlement distribution
and landscape formation in the
Western Isles of Scotland***

VOLUME 2: APPENDICES

Christopher Burgess

PhD. Thesis
University of Edinburgh
2000 AD

APPENDIX 1: TABLES RELATING TO THE RCAHMS, NMRS AND FESP.

Table 1: Simplified monument classes based on the NMRS ARTIMIS data.

<i>Monument Class</i>	<i>Count</i>
Agricultural features , including field systems and cultivation	7
Atlantic Round Houses , including Brochs, Duns and Wheel houses	41
Buildings , including blackhouses and roofed structures such as public houses	25
Burials , including Norse graves, cists and other graves.	18
Burial Cairns , including kerbed cairns and chambered cairns	13
Carving , including all rock carvings and cupmarks	4
Cairns	26
Castles	3
Communications , roads, bridges and airports	2
Crannogs	6
Ecclesiastical features , including chapels, churches, graveyards, and monasteries	40
Enclosures , of uncertain purpose	9
Find Spots , of all forms of artefacts	128
Forts , of unclassified form	7
Hut Circles , of uncertain form, some of these may be Atlantic Round Houses etc.	9
Industrial features , including mills, kilns and manufacturing sites	113
Marine Industry , including piers, kelp kilns and fish traps	13
Middens	33
Military sites	3
Miscellaneous sites , including hearths, turf cuttings and indeterminate features and records of projects	13
Mounds , settlement and other indeterminate mounds	3
Promontory Enclosures , sites listed as promontory forts	5
Settlements , settlement sites not classed as townships	23
Shielings , including beehive cells	49
Souterrains	9
Standing Stones	21
Stone Circles/Settings , including settings, alignments	31
Structures , ruined, un-roofed and non-upstanding buildings	21
townships	17
Wall features – indistinct fragments of structural and boundary wall	10
Wells	5

Table 35: Data from RCAHMS, NMRS

Data correct in August 1997

Sorted by CB class (authors interpretation of the NMRS Class field) and then by NGR

P = Parish (U = Uig, S = Stornoway, L = Lochs, B = Barvas)

Table 37: Count of monument classes from RCAHMS, NMRS, FESP data

<i>Classification</i>	<i>number of records</i>
Atlantic round house	0
Blackhouse	0
Burial	0
Cairn	0
Cell	0
Communications	0
Cultivation	0
Dyke	22
Ecclesiastical	4
Enclosure	124
Field-system	22
Habitation enclosure	139
Industry	4
Man-made islands	0
Marine industry	1
Military	0
Mill	71
Miscellaneous	2
Platforms	0
Promontory enclosures	0
Rock carvings	0
Settlement	266
Settlement mounds	0
Shieling	1458
Souterrains	0
Stone settings/ standing stones	0
Stray finds	0
Sub-peat features	0
Utilised natural islands	0
Wells	0

APPENDIX 2: TABLE OF DISCOVERY AND EXCAVATION IN SCOTLAND ENTRIES

Table 38: Discovery and Excavation in Scotland (DES) entries for the Western Isles since 1988

<i>Author</i>	<i>Date</i>	<i>Reference</i>
Andrian, BL. and Dixon, TN.	1992	Carloway Peir, Lewis, Iron Age Dun, (Uig Parish), in DES, Edinburgh, CSA
Armit, I.	1988,a	Druim nan Dearcag, Loch Olabhat, Settlement complex, (North Uist Parish), in DES, Edinburgh, CSA
Armit, I.	1988,b	Eilean Domhnuill a Spionnaidh, Loch Olabhat, Neolithic Settlement, (North Uist Parish), in DES, Edinburgh, CSA
Armit, I.	1988,c	Kneep, Wheelhouse complex and later structures, (Uig Parish), in DES, Edinburgh, CSA
Armit, I.	1989,b	Eilean Olabhat, Iron Age, Early historic settlement, (North Uist Parish), in DES, Edinburgh, CSA
Armit, I.	1989,c	Druim nan Dearcag, settlement complex, (North Uist Parish), in DES, Edinburgh, CSA
Armit, I.	1989,a	Eilean Domhnuill a Spionaidh, Early Neolithic Settlement, (North Uist Parish), in DES, Edinburgh, CSA
Armit, I.	1993	Baleshare, North Uist, Cist and Middens, (North Uist Parish), in DES, Edinburgh, CSA
Armit, I.	1995	Eilean Maliet, Wheel house and Islet settlement, (North Uist Parish), in DES, Edinburgh, CSA
Armit, I.	1996,c	Geirsclett, Chambered Tomb, (North Uist Parish), in DES, Edinburgh, CSA
Armit, I.	1996,a	An Caisteal, Hougharry, Eroding Iron Age settlement and possible corbelled cells, (North Uist Parish), in DES, Edinburgh, CSA
Armit, I.	1996,b	Camas as Chaisteil, Hougharry, Carin and hut circle, (North Uist Parish), in DES, Edinburgh, CSA
Armit, I. and Braby, A.	1995	Ceann nan Clachan, Burnt Mound and Structures, (Lochs Parish), in DES, Edinburgh, CSA
Armit, I. and Braby, A.	1996,a	Ceann nan Clachan, Burnt mound and Prehistoric Structures, (North Uist Parish), in DES, Edinburgh, CSA

<i>Author</i>	<i>Date</i>	<i>Reference</i>
Armit, I. and Dunwell, A,	1995,a	Geirsclett, North Uist, Settlement Survey, (Noth Uist Parish), in DES, Edinburgh, CSA
Armit, I. and Dunwell, A,	1995,b	Bagh an Ackara, Geirsclett, Settlement site, (North Uist Parish), in DES, Edinburgh, CSA
Atkinson, S. Mulville, J. and Parker Pearson, M.	1996	Cladh Hallan, Daliburgh, Late Bronze Age and Early Iron Age Houses, (South Uist Parish), in DES, Edinburgh, CSA
Braby, A. and Battley, N.	1996	Oban Trumisgarra (North Uist Parish), in DES, Edinburgh, CSA
Branigan, K	1989	Barra, Tangaval Peninsula, Survey and excavation, (Barra Parish), in DES, Edinburgh, CSA
Branigan, K	1996	Balnabodach, (Barra parish), Blackhouse,in DES, Edinburgh, CSA
Branigan, K.	1991	Brevig/Castlebay to Tangusdale, Survey: Various monuments, (Barra Parish), in DES, Edinburgh, CSA
Branigan, K.	1992,d	West Coast, Barra, Survey, (Barra Parish), in DES, Edinburgh, CSA
Branigan, K.	1992,c	Tangerval T166, T169, Iron Age House and Neolithic Enclosure, (Barra Parish), in DES, Edinburgh, CSA
Branigan, K.	1992,b	Tangerval T180, T211, Megalithic enclosure and medieval/modern sheiling, (Barra Parish), in DES, Edinburgh, CSA
Branigan, K.	1992,a	Southern Vatersay, Survey, (Barra Parish), in DES, Edinburgh, CSA
Branigan, K.	1992,e	East Caost, Barra, Survey, (Barra Parish), in DES, Edinburgh, CSA
Branigan, K.	1993,b	Eoligarra; Mingulay, Coastal Erosion Survey, (Barra Parish), in DES, Edinburgh, CSA
Branigan, K.	1993,a	Allt Chrysal, Neolithic and early bronze age settlement and burial site, (Barra Parish), in DES, Edinburgh, CSA
Branigan, K.	1994	Borve site B.54, LBA/EIA occupation site, (Barra Parish), in DES, Edinburgh, CSA
Burgess, C. and Church, M.	1995	Uig Sands to Aird Uig, Isle of Lewis, Survey, (Uig Parish), in DES, Edinburgh, CSA

<i>Author</i>	<i>Date</i>	<i>Reference</i>
Burgess, C. and Gilmour, S.	1995	Garenin, Carloway, Isle of Lewis, Stills, promontory fort, corndrying kiln and cairn, (Uig Parish), in DES, Edinburgh, CSA
Burgess, C. Chruch, M and Gilmour, S.	1996,f	Isle of Lewis, Coastal Erosion Survey, (Uig, Barvas), Stornoway and Lochs Parishes), in DES, Edinburgh, CSA
Burgess, C. Curtis, MR and GR. and Gilmour, S.	1996,g	Achmore, Pottery Vessel, (Lochs Parish), in DES, Edinburgh, CSA
Burgess, C. Dempsey, J. and Gilmour, S.	1996,a	An Dunan, Utilised natural island (Uig Parish), in DES, Edinburgh, CSA
Burgess, C. Dempsey, J. Gilmour, S and Jackson, A.	1996,d	Gob Eirer, Promontory Fort, (Uig Parish), in DES, Edinburgh, CSA
Burgess, C. Gilmour, S. and Church, M.	1996,c	Garenin, Blackhouse Barn, (Uig Parish), in DES, Edinburgh, CSA
Burgess, C. Gilmour, S. and Church, M.	1996,e	Guinnesso, Relict Landscape, (Uig Parish), in DES, Edinburgh, CSA
Burgess, C. Gilmour, S. and Jackson, A.	1996,b	Beirero, Blackhouse, (Uig Parish), in DES, Edinburgh, CSA
Burgess, C. Henderson, J. and Rees, T.	1994	Garenin, Deserted settlement landscape, (Uig Parish), in DES, Edinburgh, CSA
CFA	1992,b	Cnip (Kneep), Lewis, Bronze Age Cist burial, (Uig Parish), in DES, Edinburgh, CSA
CFA	1992,c	Cnip (Kneep), Lewis, Settlement and Industrial site, (Uig Parish), in DES, Edinburgh, CSA
CFA	1992,a	Cnip (Kneep), Lewis, Possible Viking Cemetry, (Uig Parish), in DES, Edinburgh, CSA
CFA	1994	Cnip Headland, Isle of Lewis, Viking Age Graves, miscellaneous eroding features, (Uig Parish), in DES, Edinburgh, CSA
Church, M	1996	Achmore, Peat cut features and wooden artefacts (Lochs parish) in DES, Edinburgh, CSA
Coles, GM.	1993,a	Conc an Tursa, Excavations, (Uig Parish), in DES, Edinburgh, CSA

<i>Author</i>	<i>Date</i>	<i>Reference</i>
Coles, GM.	1993,b	Callanish Farm, Field survey and trial excavations, (Uig Parish), in DES, Edinburgh, CSA
Coles, GM. and Burgess, C.	1994	Callanish Environs Survey, (Uig Parish), in DES, Edinburgh, CSA
Coles, GM. and Rees, T.	1994	Cnoc and Tursa, Excavation, (Uig Parish), in DES, Edinburgh, CSA
Cowie, TG.	1991	Kneep headland, Burial probable Viking, (Uig Parish), in DES, Edinburgh, CSA
Crone, BA.	1989	Bharpa, Carinish, Heath complexes and Enclosure, (North Uist Parish), in DES, Edinburgh, CSA
Crone, BA. and Mills, CM.	1988,a	Bharpa Carinish, Fieldbank and structure, (North Uist Parish), in DES, Edinburgh, CSA
Crone, BA. and Mills, CM.	1988,b	Lochportain, Linear clearance cairn, (North Uist Parish), in DES, Edinburgh, CSA
Cunningham, C.	1992,b	Baile na Cille, Burial, (Uig Parish), in DES, Edinburgh, CSA
Cunningham, C.	1992,a	Dun Swordale, Lewis, Dun, (Stornoway), in DES, Edinburgh, CSA
Cunningham, CM. and Hothersall, S	1992, c	Scaristabeg, Harris, Burial, (Harris Parish), in DES, Edinburgh, CSA
Cunningham, CM. and Hothersall, S.	1992,a	Rubdha Shilldinish, Holm, Survey of Promontory sites, (Stornoway Parish), in DES, Edinburgh, CSA
Cunningham, CM. and Hothersall, S.	1992,b	Traigh Bosta, Great Bernera, Pottery, Iron slag and stone tools, (Uig Parish), in DES, Edinburgh, CSA
Curtis, GR.	1988	Ensay, Stone bowl, (Harris Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR	1996	Achmore, Chipped Quartz, (Lochs Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1989,a	Traigh na Berie, Metal strip and rivet, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1989,b	Bernera Bridge, Standing stones, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1989,c	Tolsta Chaolais, Possible hut circles, (Uig Parish), in DES, Edinburgh, CSA

<i>Author</i>	<i>Date</i>	<i>Reference</i>
Curtis, MR. and GR.	1989,d	Achmore, Stone Circle, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1989,e	Ensay, Beaker midden, (Harris Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1990,c	Cnoc Fillibhir Bheag, Sub-circular stone setting, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1990,b	Bernera Bridge, Standing stones, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1990,d	Grianan, Graves of the Clan Morrison, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1990,e	Totarol, Kirkibost, Great Bernera, Kerb Cairn, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1990,f	Crulivig, Possible kerb cairn, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1990,a	Gearaidh Geoidaster, Cairn fieldwall and quartz flakes, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1991,b	Upper Breasclete, Small kerb cairn, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1991,c	Crulivig Island, Possible burial ciarn or platform with stone setting, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1991,e	'Olcote', Callanish, Hearth and charcoal, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1991,g	Totarol, Kirkibost, Great Bernera, Burial Cairn, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1991,h	Mol Ghibidil, Cnoc Glas nan Corran, Callanish, Hut circle or Platform, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1991,I	Sgainailt, Graves of Clan Morrison, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1991,a	Loch Faoghail an Tuim, Possible kerb ciarn or hut circle, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1991,d	Rubha nan Sgarbh, Ensay, Cup marks, (Harris Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1991,f	Beannan Mor (Tolsta Chaolais), probable burial ciarn, (Uig Parish), in DES, Edinburgh, CSA

<i>Author</i>	<i>Date</i>	<i>Reference</i>
Curtis, MR. and GR.	1992,I	Tob Ceann a' Sgrulain, Beinn Hulavig, Probable kerb cairn and possible burial cairn, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1992,g	Aird na Moine, Breasclete, Possible standing stones, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1992,k	Loch Sgardam, Breasclete, Stone structure, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1992,d	Druim Dubh, Megalithic stone circle, (Lochs Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1992,e	Gearaidh Ghuinnesbridh, Habitation sites, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1992,f	Aird Sleitinish, Possible Burial Cairn, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1992,h	Blar Allt na Torcan, Achmore, two stone mounds, (Lochs Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1992,j	Ensay peir, Ensay, Cup marks, (Harris Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1992,l	Cnoc na h-Inghinna Ruaidha, Breasclete, Possible grave and cairn, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1992,m	Faing Mhor, Hacklete, Great Bernera, Probable burial cairn, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1992,n	Creag Ruadh, Hacklete, Great Bernera, Possible burial cairn, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1992,p	Druim an Eich Dhuibh, Balallan, Stone Structure, (Lochs Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1992,q	Sidean Cleite Thog, Scaliscro, Little Loch Roag, Probable burial cairn and 18th century building, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1992,o	Feadan, Loch Geal, Possible Burial Cairn, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1993,b	Cnoc an Croich (Gallows Hills), Chambered Cairn, (Stornoway Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1993,c	Traigh Bosta, Great Bernera, Walled structure at site of Settlement, (Uig Parish), in DES, Edinburgh, CSA

<i>Author</i>	<i>Date</i>	<i>Reference</i>
Curtis, MR. and GR.	1993,a	Rubha Gruaig (Shawbost), Stone Setting, (Barva Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1994,g	Keava Island, Little Loch Roag, Prehistoric burial carin, (Uig Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1994,e	Achmore, carved stone macehead or battle axe, quartz flake and stone mound,(Lochs Parish), in DES, Edinburgh, CSA
Curtis, MR. and GR.	1994,a	Liamhrig Mhor, Leaverburgh, Cup marke bedrock, (Harris Parish), in DES, Edinburgh, CSA

APPENDIX 3: TABLES RELATING TO THE GARENIN LANDSCAPE SURVEY

Table 40: Gazetteer of sites recorded at Garenin (GLS)

After Burgess 1995 (with additions)

Sorted by classification and then by grid reference

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
NB 1955 4430	Blackhouse	Oriented north - south, this blackhouse measures 9 metres by 17 metres. The northerly or uphill room has a fire place in its north wall and an entrance from the outside in its east wall. The southern room , or Byre, appears to be of latter construction and is entered from the west through what may be the remnant of a barn.	Field walking on 6/7/94	crofting
NB 1967 4423	Blackhouse	This Blackhouse complex has yet to be described in detail. To the north east of the blackhouse is a series of square cut lazy beds and associated agricultural features.	Field walking on 7/7/94	crofting
NB 1927 4422	Blackhouse	.	Field walking on 29/6/94	crofting
NB 1940 4420	Blackhouse	The ruinous remains of this "Blackhouse" measure 6.5 metres by 10 metres with a yard to the south. One room now survives at the north end of the structure, with access through the dividing wall from the south end of the structure. Within this northern room is a fire place in the north wall and a blocked window in the east wall, the southern room, probably the byre has been completely demolished, except for parts of the east wall and may only be discerned as the faint outlines of a footing or floor surface.	Field walking on 1/7/94	crofting
NB 1942 4418	Blackhouse	Oriented North - South on the south facing slopes at the north end of the enclosed crofts this "Blackhouse" is still used as an ancillary structure and is still roofed. Measuring 6 metres by 16 metres the main structure has an entrance at its southeast corner and a blocked gable in its north gable. Abutted to the south west corner of the mains structure is a smaller secondary structure, measuring 8 metres	Field walking on 1/7/94	crofting

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
		by 3 metres, with a door set in the centre of its east wall, this structure is now roofless. to the south east a revetted yard may be seen.		
NB 1958 4417	Blackhouse	The ruinous remains of this blackhouse oriented north - south survive as three walls, with the northern gable having been completely demolished. This structure measures 10 metres by 4.5 metres and has no internal partitions, though a door and two windows can clearly be seen on the east wall.	Field walking on 6/7/94	crofting
NB 1983 4397	Blackhouse	The remains of this blackhouse measures 12 metres by 6 metres and is oriented north - south. The structure is split into two rooms the northern one measuring 3 metres in length and the southern one measuring 9 metres. Separate entrances for both can be seen in the east wall. A Large enclosure denoted by a single course of stones can be seen immediately to the east of this structure. This enclosure measures 57 metres by 19 metres and is oriented north - south.	Field walking on 5/7/94	crofting
NB 1972 4386	Blackhouse	Oriented southwest - northeast this structure measures 7 metres by 12 metres and has two opposed doorways into the byre (thought the door in the east wall has been blocked. Immediately to the south and the west of this structure three large cultivation platforms/terraces can be seen.	Field walking on 5/7/94	crofting
NB 1970 4383	Blackhouse	This blackhouse measures some 300 metres in length and 10 metres in width and is laid out in the manor typical to the village with a family dwelling at the north end of the structure, with a fire place in the north gable. At the south end of the structure is a byre and to the west side is a barn. Two entrances are provided in the east wall, one being to the dwelling and one being to the byre. A door leads from the byre to the barn, which also has an entrance to the outside in its west wall. To the west of the structure is a large enclosed yard 20 metres wide and 40 metres long.	Field walking on 5/7/94	crofting
NB 1978 4381	Blackhouse		Field walking on 4/7/94	crofting

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
NB 1979 4375	Blackhouse	Oriented north - south this blackhouse is of a very early design having only one entrance in its south end that opened directly into the byre. The Dwelling was then entered through the byre. A latter barn abuts the west wall and was accessible from the byre or from a door in its south wall. This "blackhouse" has no apparent flue or fireplace in its dwelling area.	Field walking on 4/7/94	pre-crofting
NB 1952 4430	Dwelling House	Post dating 8/7 this structure is of stone and mortar, but has also been abandoned. This a typical post black house early 20th - century single storied cottage with two rooms off a central passage way and a later extension on the west side.	Field walking on 6/7/94	modern
NB 1940 4420	Ancillary structure	Measuring 5 metres by 10 metres this dry stone and earth construction has semi-circular ends and an entrance on its west side. The walls survive to little over 1 metre in height and, the purpose. of the structure is now unclear.	Field walking on 1/7/94	crofting
NB 1923 4422	Bank	This turf and stone dyke is heavily denuded, measuring 0.15 metres - 0.20 metres in width and marks the boundary between crofts 3 and 4. An enclosure of similar construction lies on the west side of the wall, at its north end. Measuring 19 metres by 19 metres this enclosure is sub circular and open on its north side. Within the enclosure are the rectilinear remains of a structure of earlier date. It appears that this structure is cut by the main wall dividing crofts 3 and 4. The remains of this structure measure 4 metres by 14 metres and consist of low turf walls standing 0.10 metres high and 0.30 metres wide.	Field walking on 28/6/94	unknown
NB 1922 4409	Bank and ditch	At the foot of the main south facing slope within croft 3, this complex of dry stone and turf dykes crosses the croft from its centre towards its western extent. Starting at two south facing "Lazy beds" each measuring 2 metres by 4 metres the wall runs west for 3 metres before heading south for 20 metres. Along its length as it runs south is a drain some 0.30 metres deep and 0.75 metres wide. This drain is stone lined and of no apparent purpose starting and terminating on open ground. As the drain terminated the wall turns to	Field walking on 28/6/94	pre-crofting

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
		the west and runs as a revetment to the croft boundary. 2 -3 metres to the west of the drain is a second turf bank that also runs north to south.		
NB 1919 4393	bank and ditches	Elevation: 25-35m OD Orientation: NE/SW Possible period: Pre-improvement/Post Medieval/Modern Situated on hillside Vegetation cover: Rough grazing Stone- lined drainage ditches running down the field. One drain curves to join up with another and where this does so there is a stone-revetted platform. Walls lining the ditches are quite upstanding in places - up to 1m high and there are numerous cairns along their length. Stone cairn on edge of bedrock at field boundary. Drains join up and pass round bedrock at top of field.		unknown
NB 1928 4420	banks and ditch	Elevation: 25m OD Orientation: SE/NW Aspect: SE/NW Possible period: Pre-improvement/Post Medieval/Modern Situated on hillside Vegetation cover: Rough grazing Cultivation platforms and drainage ditches running up to stone-walled platform		crofting
NB 2079 4517	Blackhouse		Field walking on 27/9/95	post medieval
NB 1929 4396	bridge	Elevation: 8m OD Orientation: NE/SW Possible period: Pre-improvement/Post Medieval/Modern Situated on valley floor Vegetation cover: Rough grazing Stone bridge for crossing canalised stream. Overgrown with turf and made up of	4 or 5 slabs of stone	crofting
NB 1938 4395	Bridge	The remains of this small foot bridge lie in the water of the canalised burn that runs through the centre of the croft lands from east - west. Consisting of 3 stone supports and a wooden deck, this bridge would allow local access to the south end of the crofts.	Field walking on 1/7/94	crofting
NB 1949 4392	Bridge	Of drystone construction, this bridge was built to provide local access across the burn in the crofts. Measuring 2 metres in width, its surface cobbles are completely covered with turf.	Field walking on 5/7/94	crofting
NB 1949 4388	Bridge	Crossing the stream that runs from Loch	Field	crofting

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
		Liuravat to the sea is a small stone built bridge that is now heavily collapsed and denuded.	walking on 2/7/94	
NB 1955 4387	Bridge	This crossing of the small stream running from Luiravat to the sea consists of three large flat stone slabs laid over the burn.	Field walking on 4/7/94	crofting
NB 1939 4483	Cairn	Measuring 2m metres in diameter, this low cairn or stone covered mound is roughly circular and has evidence of burning and charcoal on its southwest side in amongst the stones.	Field walking on 2/7/94	unknown
NB 1961 4471	Cairn	Sitting on a low knoll this cairn measures o 1 metre in diameter and is of uncertain date.	Field walking on 4/7/94	unknown
NB 2011 4458	Cairn		Field walking on 28/9/95	unknown
NB 1945 4451	Cairn	Unlike the cairns formed on the summits of the peaks surrounding Garenin this cairn appears to be of some antiquity being partially buried in the peat and measuring 1 .5 metres by 1 metre. Siting on a low mound, this collection of stone may represent a much larger collection of stones buried under the peat.	Field walking on 4/7/94	unknown
NB 2089 4444	Cairn		Field walking on 27/9/95	unknown
NB 2080 4441	Cairn		Field walking on 27/9/95	unknown
NB 1913 4389	Cairn	This large clearance cairn is just one of 7 in the immediate vicinity. measuring approximately 2 metres in diameter it marks the clearance of the south end of crofts 3 and 4 of large stones.	Field walking on 29/6/94	unknown
NB 2038 4388	Cairn		Field walking on 27/9/95	unknown
NB 1911 4385	Cairn	This cairn marks the southern extent of the field clearance in croft 4.	Field walking on 29/6/94	unknown
NB 1972 4338	Cairn	Visible in the water of Loch Liuravat, 4 metres from the north shore is a small	Field walking on	unknown

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
		cairn. sitting in about 1 metre of water this cairn is in the region of 2 metres in diameter.	4/7/94	
NB 1902 4314	Cairn	This small cairn measures 1 metre by 0.9 metres and consists of loose rubble. It is unlikely to be of any great antiquity.	Field walking on 7/7/94	unknown
NB 1896 4227	Cairn		Field walking on 28/9/95	unknown
NB 1915 4519	Cairn and shelter	Two large pieces of bedrock are linked by a stretch of dry stone wall to form a shelter Immediately to the south of a small cairn measuring less than 1 metre in diameter.	Field walking on 1/7/94	unknown
NB 1962 4479	Cairn and wall	A 25 metre length of stone walling sits on a natural terrace in a north facing slope. Oriented west - east this wall appears to be very carefully constructed in places though it has many gaps. Immediately to the north is a small cairn, that has partially become overgrown with turf. To the south is a second, more modern cairn that sits on top of the modern ground surface.	Field walking on 2/7/94	unknown
NB 1962 4479	Cairn and wall	A 25 metre length of stone walling sits on a natural terrace in a north facing slope. Oriented west - east this wall appears to be very carefully constructed in places though it has many gaps. Immediately to the north is a small cairn, that has partially become overgrown with turf. To the south is a second, more modern cairn that sits on top of the modern ground surface.	Field walking on 2/7/94	unknown
NB 1933 4362	Cairn/Enclosure	This oval structure measures 3 metres by 2 metres and is largely covered with turf. Several stones can still be seen through the grass around the edges of the structure, and more can be felt, underfoot in the centre.	Field walking on 5/7/94	unknown
NB 1956 4410	Cairn/Spring	Situated next to a drainage ditch, this small cairn may represent the collapsed cap of a spring or well.	Field walking on 5/7/94	unknown
NB 1891 4495	Cairn?	Comprising a scatter of stone set in the peat immediately above the sea cliffs to the north of Loch Garenin. Several of these set stone are slabs set on edge, and	Field walking on 1/7/94	unknown

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
		stamping on the ground indicates a hollow area immediately surrounding the visible monument.		
NB 1922 4404	cairns	Elevation 15m OD Orientation: W/E Aspect: S/W Possible period: Pre-improvement/Post Medieval/Modern Situated on hillside Vegetation cover: Rough grazing 5 clearance cairns, 2 of which are piled on bedrock. Situated to SE of monument 7		crofting
NB 1969 4347	Causewayed islet	Near the northwest corner of Loch Luirivat are several small natural bedrock Islets that are linked to the west shore of the Loch by a manmade causeway of stones some 10 metres long that lies just beneath the waters surface.	Field walking on 2/7/94	early prehistoric
NB 1755 4265	Causewayed natural islet		Field walking on 28/9/95	later prehistoric
NB 2091 4536	Cell or shieling		Field walking on 28/9/95	medieval
NB 2115 4520	cells		Field walking on 28/9/95	later prehistoric
NB 2064 4483	Cells		Field walking on 27/9/95	early medieval
NB 1853 4249	Cells		Field walking on 28/9/95	medieval
NB 2038 4389	Clearance Cairn		Field walking on 27/9/95	unknown
NB 1863 4262	clearance cairn		Field walking on 28/9/95	crofting
NB 1863 4262	clearance cairns		Field walking on 28/9/95	crofting
NB 1930 4336	Crannog?	A shallow area of reeds was noted in the centre of Loch Breivat that is roughly circular and up to 10 metres in diameter. This site needs to be confirmed or	Field walking on 2/7/94	early prehistoric

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
		otherwise by diving.		
NB 1994 4499	Cultivation		Field walking on 28/9/95	crofting
NB 2104 4491	Cultivation		Field walking on 28/9/95	pre-crofting
NB 2126 4489	Cultivation		Field walking on 28/9/95	pre-crofting
NB 2140 4483	Cultivation		Field walking on 28/9/95	pre-crofting
NB 2144 4476	Cultivation		Field walking on 28/9/95	pre-crofting
NB 2148 4470	Cultivation		Field walking on 28/9/95	pre-crofting
NB 1916 4436	Cultivation	A series of lazy beds lies immediately to the north of 1/6 on the south facing slope above crofts 1 and 2. The eight platforms are oriented southwest - north east and are built up to provide a level well drained cultivation surface with ditches between each bed. The largest, at the downhill side of the site, is 8 metres wide by 20 metres long. The smallest bed, at the highest point on the site, is 5 metres by 5 metres.	Field walking on 4/7/94	crofting
NB 1891 4429	Cultivation	to the west of the village and to the south of Loch Garenin an area of rig and furrow may be seen facing west on the top of the cliffs overlooking the Atlantic. These rigs predated the last stages of agricultural activities within the village and use every available piece of ground skirting neatly around rock outcrops and cliffs. The rigs range in length from 18 metres to 31 metres and have an average wave length of 3 metres.	Field walking on 30/6/94	pre-crofting
NB 1923 4416	Cultivation	Measuring 45 metres in width this group of 5 "Lazy beds" faces west and looks out over the beach of Garenin Bay. At the northern end of the group are 4 regular beds oriented west - east, measuring 5	Field walking on 28/6/94	crofting

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
		metres in width and ranging in length from 20 metres to 6 metres, separated by square cut ditches, 0.30 metres wide. At the south end of the site is one bed, oriented north - south and measuring 20 metres in length and 6 metres in width. This area of cultivation lies immediately to the west of 4/1		
NB 1905 4404	Cultivation	To the south of the burn running through the crofts, in crofts 1 and 2 is an extensive system of cultivation and drainage. This system consists of stone lined drains running from the south downhill to the burn, many clearance cairns and 36 north facing lazy beds of varying sizes.	Field walking on 30/6/94	crofting
NB 1865 4370	Cultivation		Field walking on 28/9/95	pre-crofting
NB 1875 4360	Cultivation	This area of rig and furrow is on the southwest facing slopes above Loch Duhb na Glair and probably dates to post medieval times. Little evidence of habitation was noted, the only signs being a possible hearth in the centre of the area.		pre-crofting
NB 1845 4355	Cultivation	This small area of rigs and furrow sits on a southwest facing slope immediately above the burn that runs from Loch Dubh na Glair's west side to the sea. 3 distinct rigs survive measuring 2 metres in width and 10 metres in length.	Field walking on 7/7/94	pre-crofting
NB 1860 4355	Cultivation	Immediately to the south of the small tributary stream that flows into the northeast corner of Loch Breivat are a series of rigs. These rigs run in two directions on either side of a small marshy area by the loch side. To the east the rigs run southwest - northeast, and to the west of the marsh they run southeast - northwest.	Field walking on 7/7/94	crofting
NB 1982 4355	Cultivation	In an area immediately outwith the enclosed cofts to the east of the village an area of lazybedding and old peat cuttings may be seen. oriented east - west and lying on the valley floor to the north of Loch Liuravat the remains of at least 4 beds may be discerned.	Field walking on 4/7/94	pre-crofting
NB 1825 4350	Cultivation		Field	pre-crofting

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
			walking on 28/9/95	
NB 1979 4321	Cultivation	Situated on north facing slopes are a series of rigs running north - south and a D - shaped platform built against a bedrock face that has collapsed partly obscuring the monument.	Field walking on 7/7/94	pre-crofting
NB 1818 4320	Cultivation	This area of lazy bedding sits in the bottom of a small valley to the southwest of Loch Dubh na Glair. The rigs run in a north - south direction towards the loch and are similar, morphologically to other cultivation remains in the immediate region to the loch.	Field walking on 7/7/94	pre-crofting
NB 1850 4320	Cultivation		Field walking on 28/9/95	pre-crofting
NB 1980 4317	Cultivation	A small enclosure formed by modern fences on its east and south sides and a drystone wall on its northwest side contains within it evidence of square cut lazy bedding and earlier rig and furrow cultivation.	Field walking on 7/7/94	crofting
NB 1980 4317	Cultivation	A small enclosure formed by modern fences on its east and south sides and a drystone wall on its northwest side contains within it evidence of square cut lazy bedding and earlier rig and furrow cultivation.	Field walking on 7/7/94	unknown
NB 1914 4311	cultivation	A series of rigs runs from the southeast to the northwest. The wave length of these rigs is 2.5 metres and they appear to be of a rougher more rounded construction than the late "Lazy beds" related to the last phases of cultivation within the village.	Field walking on 7/7/94	pre-crofting
NB 1834 4265	cultivation		Field walking on 28/9/95	pre-crofting
NB 1770 4250	Cultivation		Field walking on 28/9/95	pre-crofting
NB 2074 4404	Dam or dyke		Field walking on 27/9/95	pre-crofting

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
NB 1884 4346	Day shelter		Field walking on 28/9/95	unknown
NB 1860 4313	Day shelter		Field walking on 28/9/95	unknown
NB 1913 4393	Ditch	Running for 44 metres down the slope from the south end of croft 4 this ditch is of a similar construction to those found in croft 3.	Field walking on 29/6/94	unknown
NB 1905 4391	Ditch	This stone lined ditch is the uphill continuation of the most westerly ditch recorded in monument 4/11. This ditch runs for 15 metres up slope to the south before terminating in a small cairn, that may be the tumbled remains of a well or spring head.	Field walking on 29/6/94	unknown
NB 1906 4388	Ditch and cairn	This stone lined ditch runs for over 37 metres south up slop from a cairn at its north end. At its south, or uphill end this ditch becomes a bank that curves around to the west in a 7 metre arc before petering out.	Field walking on 29/6/94	unknown
NB 1913 4388	Ditch and cairn	This stone lined ditch runs for over 37 metres south up slop from a cairn at its north end. At its south, or uphill end this ditch becomes a bank that curves around to the west in a 7 metre arc before petering out.	Field walking on 29/6/94	unknown
NB 1935 4419	drainage ditches	Elevation: 20m OD Orientation: N/S Aspect: NW/SE Possible period: Pre-improvement/Post Medieval/Modern Situated on hillside Vegetation cover: Rough grazing Drainage ditches crossing the field. Some are stone-lined.		unknown
NB 1934 4402	drainage ditches	Elevation: 15-10m OD Orientation: NE/SW Aspect: E/S/W Possible period: Pre- improvement/Post Medieval/Modern Situated on hillside Vegetation cover: Rough grazing Drainage ditches, stone-lined in places.		unknown
NB 1926 4392	drainage ditches	Elevation: 18m OD max Orientation: NE/SW Aspect: NE Possible period: Pre- improvement/Post Medieval/Modern Situated on hillside Vegetation cover: Rough grazing Stone-lined drainage ditches running down field towards		unknown

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
		stream. More prominent at SE edge of field.		
NB 1924 4387	drainage ditches	Elevation: 20m OD Orientation: NW/SE Aspect: E Possible period: Pre-improvement/Post Medieval/Modern Situated on hillside Vegetation cover: Rough grazing Stone-lined drainage ditches. Stone quite upstanding in places. Drains interconnect. 2 turf-covered cairns nearby. Ditches run up to field boundary and beyond and have a step-like construction.		unknown
NB 1926 4384	drainage ditches	Elevation: 30-10m OD Orientation: NE/SW Aspect: W/N Possible period: Pre-improvement/Post Medieval/Modern Situated on hillside Vegetation cover: Rough grazing Drainage ditches running down field.		unknown
NB 1918 4377	drainage ditches	Elevation: 35m OD Orientation: N/S Aspect: E Possible period: Pre-improvement/Post Medieval/Modern Situated on hillside Vegetation cover: Rough grazing Stone-lined drainage ditches running across field towards field boundary from bedrock		unknown
NB 1922 4376	drainage ditches	Elevation: 30m OD Orientation: N/S Aspect: SE Possible period: Pre-improvement/Post Medieval/Modern Situated on hillside Vegetation cover: Rough grazing A number of drainage ditches forming raised platforms 2-3m across. Stone-lined and turf-covered. Also a number of cairns.		unknown
NB 1920 4374	drainage ditches	Elevation: 35m OD Orientation W/E Aspect: NE/SW Possible period: Pre-improvement/Post Medieval/Modern Situated on hillside Vegetation cover: Rough grazing Drainage ditches stone-lined in places and associated with clearance cairns		unknown
NB 1912 4396	Drainage system	A series of 6 parallel stone lined drainage ditches run southwards, up hill from the burn in the centre of the croft. Situated a roughly 5 metre intervals across the croft, these ditches are 0.70 metres - 1 metre wide and often have stone dykes situated immediately beside them. Theses stone dykes represent both dredging of the ditches and the building of leves to	Field walking on 29/6/94	unknown

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
		further increase the drainage capacity.		
NB 1922 4442	Dry Stone Structure	This monument consists of the remains of two dry stone structures linked by a short wall. The more westerly structure is vaguely rectangular and appears to represent a temporary shelter or dwelling. The Structure to the east is roughly D shaped and built against a rock face; This structure appears to have been a stock enclosure. This monument is situated 40 metres to the west and down slope of NB 1923 4444 and runs parallel to it.	Field walking on 4/7/94	early medieval
NB 1933 4506	Dry stone walls	This series of dry stone walls are situated on top of a bedrock rise, with small incised valleys on either side. The walls themselves are numerous and run in all directions, linking various areas of bed rock. The walls on the whole are only 1 course high and sitting in peat. It is unclear whether this series of walls makes up an area of multiple shielings or stock enclosures.	Field walking on 1/7/94	unknown
NB 1928 4408	dry stone walls	Elevation: 25m OD Orientation: E/W Aspect: S/W Possible period: Pre-improvement/Post Medieval/Modern Situated on hillside Vegetation cover: Rough grazing Turf-covered dry stone wall with another wall abutting at end of which is cairn. Another wall curves round from field boundary but this is heavily denuded.		unknown
NB 1975 4370	Dwelling house	Sat on a natural mound, this dwelling post-dates "blackhouse" 24/3 being built partially with stone from that site. Measuring 5 metres by 14.5 metres this structure survives as masonry gable ends with the walls which were prefabricated in wood having been reused to build the loom shed that houses John MacGreggors loom. This dwelling house had a fire place in either gable and was probably two roomed with access of a central corridor.	Field walking on 4/7/94	modern
NB 2107 4513	Dyke		Field walking on 28/9/95	unknown
NB 2116 4511	Dyke		Field walking on 28/9/95	unknown

NB 1836 4233	early blackhouse		Field walking on 28/9/95	post medieval
NB 1830 4230	early blackhouse		Field walking on 28/9/95	post medieval
NB 1985 4535	Enclosure		Field walking on 27/9/95	unknown
NB 1945 4432	Enclosure	Measuring 21 metres by 30 metres this sub rectilinear enclosure stands up to 1 metre in height and is of dry stone construction with no apparent entrance. It is likely that this enclosure is a field for vegetable cultivation	Field walking on 5/7/94	unknown
NB 1943 4430	Enclosure	This square dry stone enclosure has walls 22 metres in length and no apparent entrance. Located immediately to the southwest of 6/1, a small cairn and subsidiary enclosure may be seen to the west. The remains of this smaller enclosure measure 3 metres square.	Field walking on 5/7/94	crofting
NB 1918 4421	Enclosure	A 3 metre stretch of dry stone wall runs southeast - northwest, immediately to the east of 3 clearance cairns forming the outline of a roughly oval enclosure.	Field walking on 30/6/94	crofting

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
NB 1929 4421	Enclosure	This enclosure sits immediately to the north of structure a on croft 5 (the SYHA hostel). Represented by low turf covered fieldwalls the enclosure measures 30 metres by 30 metres and runs uphill from structure 5a. There are two breaks in the enclosure, the first being at its southwest corner where it approaches structure 5a, this appears to be a deliberate entrance. The second break is at its northeast corner, where the wall runs towards a large bedrock out crop and is also crossed by a foot path. It is likely that the wall originally ran all the way to the outcrop and that it has been damaged by the path.	Field walking on 5/7/94	crofting
NB 1925 4419	Enclosure	Consisting of dry stone walls the recliner enclosure measures 12 metres by 18 metres and is abutted to a larger enclosure of similar construction in croft 5. There is no apparent entrances to either enclosure.	Field walking on 29/6/94	crofting
NB 1928 4419	enclosure	Elevation: 26m OD Orientation: northeast/SW Aspect: S/W Possible period: Pre- improvement/Post Medieval/Modern Situated on hillside Vegetation cover: Rough grazing Stone walled, irregular shaped enclosure. Revetted as it dips on NW side. Associated with 2 clearance cairns at SE end		crofting
NB 1913 4417	Enclosure	This circular enclosure measures 1 metre internal diameter and is of dry stone construction standing up to 1 metre in height and filled with small stones suggesting it is related to field clearance activities.	Field walking on 30/6/94	crofting
NB 1917 4415	Enclosure	Measuring 9 metres by 12 metres this rectilinear sits directly to the south of 4/4. Consisting of dry stone walls utilising sporadic natural boulders this enclosure sits on a slight terrace that can be seen on its nothwest side. No entrance can be discerned, suggesting that this enclosure is a "potato" field. A turf and stone dyke runs from the west corner in a southerly direction.	Field walking on 28/6/94	crofting
NB 1923 4415	Enclosure	Built against a west facing shear bedrock face this d shaped platform is levelled and has a stone lip or wall surrounding it. Measuring 11 metres by 7 metres a turf bank subdivides the interior. This	Field walking on 28/6/94	pre-crofting

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
		platform may represent an enclosed area of cultivation used as a vegetable garden, or may be the remains of an older structure related to previous occupation of the site.		
NB 1943 4415	Enclosure	Immediately to the south and east of 7/23 is a rectilinear platform. This platform has a low turf bank on its north side, that may have at one time, surrounded the whole platform.	Field walking on 2/7/94	crofting
NB 1909 4413	Enclosure	Sited immediately adjacent to the north bank of the burn running through the crofts, this rectilinear enclosure of dry stone construction, measures 8 metres by 12 metres and is open on its south side where it backs onto the burn.	Field walking on 30/6/94	crofting
NB 1959 4412	Enclosure	The remains of two stretches of turf wall, make up three side of an enclosure measuring 17 metres by 10 metres on the south facing slopes of the crofts. This enclosure has no southern wall, so the over all extents are unclear.	Field walking on 6/7/94	crofting
NB 1940 4411	Enclosure	Within the immediate vicinity of the most modern structure on croft 11 (presently unoccupied) is a ruinous stone enclosure. Situated to the east of the modern house this enclosure is marked by a revetment forming a "kale yard" measuring 17 metres by 8 metres. This yard is likely to be related to 7/2 the " Blackhouse" that predates the modern house on croft 11.	Field walking on 1/7/94	crofting
NB 1976 4411	Enclosure	This rectangular structure measures 5 metres by 6 metres is of stone construction standing to 1 metre in height. An entrance can be seen at the south end of the west facing wall.	Field walking on 7/7/94	crofting
NB 1906 4410	Enclosure	This small circular enclosure measures 2 metres in diameter and is infilled with may smaller stones. It is likely that this monument represents an elaborate field clearance scheme designed to prevent cleared stone from spreading back on to the fields.	Field walking on 30/6/94	crofting
NB 1954 4410	Enclosure	Built of dry stone construction, this enclosure has three surviving side, been open to the north, and measures 13 metres by 14 metres.	Field walking on 6/7/94	crofting

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
NB 1927 4409	enclosure	Orientation: N/S Possible period: Pre-improvement/Post Medieval/Modern Situating on hillside Vegetation cover: Rough grazing Stone walled enclosure 10m x 14m and revetted at end		crofting
NB 1917 4408	Enclosure	This semi - circular enclosure measures 4 metres in radius and is of dry stone construction, with no apparent entrances. constructed against a flat south facing area of outcrop this enclosure is similar in construction to those found in croft 3.	Field walking on 29/6/94	crofting
NB 1967 4404	Enclosure	This enclosure consists low turf covered walls and measures 15 metres northeast - southwest and tapers in width from 6 metres at its southwest end to 3 metres at its northeast end. This enclosure has no surviving wall at its southwest end.	Field walking on 5/7/94	crofting
NB 1924 4403	Enclosure	Built against the dry stone croft boundary on the east side of croft 3 this dry stone construction has largely collapsed. No entrance to this 7 metre by 5 metre structure could be discerned.		crofting
NB 1937 4403	Enclosure	This dry stone enclosure is rectilinear an measures 21 metres by 12 metres at its south end, tapering to 5.5 metres at its north end. The walls on this structures west, east and north side are of less substantial construction and appear to be abutted to the southern wall, which is almost twice as thick. At the west end of the south wall, within the enclosure, the remains of a small enclosure measuring 2 metres square may be discerned; Also in the centre of the north face of this south wall a large ambry or recess may be seen. This recess measures 0.75 metres across and is 0.60 metres deep and is of corbbed construction unlike the more simple ambrys regularly seen in "Blackhouses", and may be the remains of a bread over or, kiln.	Field walking on 1/7/94	crofting
NB 1937 4403	Enclosure	Situated on a south facing slope this rectilinear dry stone enclosure measures 15 metres by 37 metres. A small entrance can be seen in the north wall, and internally the enclosure is divided in to 5 platforms for cultivation. On the west side of this enclosure are two long platforms 18 and 20 metres in length by 7 metres in width, and on the east side are	Field walking on 2/7/94	crofting

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
		three platforms, 10 metres by 6.5 metres.		
NB 1945 4403	Enclosure	With construction of drystone walls, this enclosure measures 12 metres by 48 metres and has three surviving walls, the wall to the west having largely been robbed away. An entrance, 1.5 metres wide survives in the north wall.	Field walking on 4/7/94	crofting
NB 1969 4402	Enclosure	This drystone construction measures 20 metres by 8 metres and is oriented west - east. Consisting of two chambers internally , measuring 15 an 5 metres in length much of the south wall of this structure has been robbed or has collapsed. A spring can be seen 7 metres from the east end of this structure indicating that it may have once been a dwelling.	Field walking on 6/7/94	pre-crofting
NB 1919 4401	Enclosure	Measuring 3 metres by 4 metres this small stone enclosure is constructed of drystone walls that have largely collapsed. No entrance to this structure can be discerned.	Field walking on 28/6/94	crofting
NB 1946 4401	Enclosure	Of drystone construction and measuring 15 metres by 6.5 metres it has suffered robbing in places. Built after the last episode of drainage in the field, small passages in the walls allow the drains to flow uninhibited.	Field walking on 5/7/94	crofting
NB 1945 4400	Enclosure	Abutted to the enclosure in the neighbouring croft, this drystone construction measures 7 metres by 15 metres and has an entrance its west face.	Field walking on 5/7/94	crofting
NB 1970 4399	Enclosure	Consisting of very ephemeral Consisting stone and turf dykes this enclosure measures 6 metres square.	Field walking on 6/7/94	pre-crofting
NB 1915 4396	Enclosure	Now largely ruinous this small enclosure measures roughly 6 metres by 6 metres. Originally of drystone construction all the wall have now collapsed making interpretation difficult.	Field walking on 29/6/94	crofting
NB 1946 4396	Enclosure	Measuring 42.5 metres by 7.5 metres this structure abuts an adjacent enclosure and is of Drystone construction with its walls standing to 1.5 metres in height with no apparent entrance.	Field walking on 4/7/94	crofting

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
NB 1959 4396	Enclosure	Measuring 12 metres by 2 metres and oriented northwest - southeast, this enclosure is of drystone construction and has no apparent entrance. immediately adjacent to this structure on its east side is a cultivation platform measuring 10 metres by 3 metres.	Field walking on 5/7/94	crofting
NB 1927 4393	Enclosure	This feature is oriented southeast - northwest and consists a drystone enclosure at its northwest end, that measures 2.5 metres by 5 metres and has no apparent entrance, a line of boulders 4 long that runs into a low bank 4 metres long. This bank marks the southeast end of the monument and widening to a small mound 7.5 metre in diameter.	Field walking on 5/7/94	pre-crofting
NB 1962 4393	Enclosure	This feature is oriented southeast - northwest and consists a drystone enclosure at its northwest end, that measures 2.5 metres by 5 metres and has no apparent entrance, a line of boulders 4 long that runs into a low bank 4 metres long. This bank marks the southeast end of the monument and widening to a small mound 7.5 metre in diameter.	Field walking on 5/7/94	unknown
NB 1985 4385	Enclosure	This turf banked enclosure survives on its north and east side, running north - south for 60 metres and east - for 40 metres. This enclosure is truncated by the roadway monument 24/2 immediately to the north of which are a series of 3 metre long terraces that are oriented east - west. Within the larger enclosure is a wall that runs north to south that appears to differentiate between high quality grazing to the west and an area of bed rock outcropping to the east.	Field walking on 4/7/94	pre-crofting
NB 1937 4380	Enclosure	Measuring 5 metres by 9.5 metres this enclosure is of drystone construction, and has no entrance in its walls, that stand to 1 metre in height.	Field walking on 5/7/94	crofting
NB 1929 4368	Enclosure	Only half of this structure survives, the eastern half having been destroyed by the construction of the croft boundary. The remaining u - shaped structure measures 3 metres by 4 metres and is orient northwest - southeast and is of drystone and earth construction. This fragmentary remain may represent an earlier	Field walking on 4/7/94	unknown

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
		blackhouse or sheiling.		
NB 1934 4368	Enclosure	This rectilinear enclosure measures 10 metres by 17 metres and is of turf construction, standing to high of 0.30 metres. No entrance can be discerned in the wall line.	Field walking on 5/7/94	crofting
NB 1949 4368	Enclosure	This small drystone enclosure measures 4 metres by 2 metres and is oriented north - south. This monument was heavily denuded and overgrown and no entrance could be discerned.	Field walking on 5/7/94	pre-crofting
NB 1952 4367	Enclosure	Measuring 24 metres by 18 metres this drystone enclosure sits amidst lazy beds and agricultural terraces. Abutted to the north west side of this enclosure is a second smaller enclosure measuring 5 metres by 5 metres, neither enclosure have entrances. Within the immediate vicinity there is also 5 clearance cairns.	Field walking on 5/7/94	crofting
NB 1953 4365	Enclosure	This enclosure is represented by a single course of stone s and measures 11 metre by 11 metres. it is surrounded by large clearance cairns.	Field walking on 5/7/94	crofting
NB 1959 4365	Enclosure	Measuring 5 metres square this drystone enclosure has no entrance and has suffered heavy collapse with much of the tumble lying inside the enclosure.	Field walking on 4/7/94	crofting
NB 1980 4362	Enclosure	Situated against an east facing rock outcrop are a series of drystone enclosures measuring 2 metres by 3 metres. It is unclear whether these remains represent one larger structure or several smaller enclosures.	Field walking on 3/7/94	unknown
NB 1929 4358	Enclosure	This Drystone enclosure measures 8 metres by 13 metres and has an entrance at the east end of the north wall.	Field walking on 5/7/94	unknown
NB 1978 4327	Enclosure	On the north east shore of Loch Liuravat is a small D shaped enclosure built at the foot of the south facing cliff on the loch shore. This enclosure measures 7 metres northwest - southeast and 2 metres west - east. To the north is a 7 metre stretch of stone an turf fieldwall running in a northwest - southeast direction.	Field walking on 7/7/94	medieval
NB 1980 4318	Enclosure	This small D - shaped enclosure measures 4 metres by 2 metres and is built against a	Field walking on	unknown

NB 2010 4540	Illicit Still		Field walking on 27/9/95	pre-crofting
NB 1973 4335	Jetty	Situated immediately to the south of monument 26/9 are two parallel rows of small boulders 1.5 metres apart that run south into Loch Luiravat. This feature would appear to be some sort of launching point for boats or fishing stance.	Field walking on 4/7/94	unknown
NB 1965 4431	Kiln	This monument is the best preserved cereal drying kiln in the environs of Garenin. Oriented west - east and measuring 8 metres by 5 metres, the flue survives intact as also does the kiln chamber itself. The structure stands to height of 1 metre and is situated to the north of the village and to the east of 8/1.	Field walking on 5/7/94	crofting
NB 1914 4421	Kiln	Situated immediately above the beach at Loch Garenin, this sub rectilinear dry stone and earth construction measures 7 metres by 5 metres. The structure is in a ruinous state, and has at its east end the remains of a kiln that is said to have been used to dry cereal crops.(Pers. Com. J MacGreggor.) Better examples of such kilns may be seen at monument X and Y, both of which are morphologically similar to this site.	Field walking on 30/6/94	pre-crofting
NB 1936 4400	Kiln	Nestled against a west facing rock face this drystone structure measures 8 metres by 3 metres externally and is divided evenly in two internally by large stone authostats. To the south of the division is a open room, to the north is a covered chamber with a flue on it's east side. This camber appears to be the intact chamber of a cereal drying kiln. Immediately to the east and north east of this structure are large enclosed, platformed areas used for cultivation.	Field walking on 1/7/94	crofting
NB 1958 4439	Midden	To the north of the village is a large area of midden deposits that conceivably date back to the 19th century. The midden includes shoes, glass, iron pots and pans and household ceramics. This spread of material covers an are several hundreds metres square but can be seen in	Field walking on 4/7/94	unknown

		structures incorporate bedrock. Situated near stream and known monument 23		
NB 1839 4232	Promonotory enclosure		Field walking on 28/9/95	later prehistoric
NB 1913 4418	Revetment	Running along the boundary between croft 1 and 2 for 30 metres, south from the track, this revetment creates an area of level cultivable land in croft 2. At its south end this revetment abuts the top of a bedrock scarp running west to east.	Field walking on 30/6/94	unknown
NB 1972 4338	Revetment	A drystone revetment has been constructed along the loch shore of Loch Luiravat to prevent shore resin.	Field walking on 3/7/94	unknown
NB 1866 4251	Revetted track		Field walking on 28/9/95	crofting
NB 1980 4375	Road	This stretch of roadway starts at NB 1990 4350 and runs to NB 1975 4380 and represents the original alignment of the village before most of the new dwellings that date to the mid 20th century were built on the ridge immediately to the north. This track has a metalled surface.	Field walking on 4/7/94	pre-crofting
NB 1937 4335	rock shelter/wall	Elevation: 30m OD Orientation: NE/SW Aspect: S/W Possible period: Unsure Situated on hillside Vegetation cover: Rough grazing Small rock shelter used by sheep. Overlooking Loch Brenat to S. Unremarkable in appearance.		early prehistoric
NB 1940 4420	Secondary structure	The remains of this dry stone structure lie about 10 metres to the east of structure 5a. While the western side is partially collapsed and grass covered, dry stone walls up to 1 metre thick can be seen on the east side. No entrance can be discerned to this structure, which measures 6 metres by 5 metres and may have been a loom shed similar to the one on croft 1.	Field walking on 6/7/94	crofting
NB 1973 4503	Settlement	The low lying valley that the Fivig burn flows through to the sea is the first low lying valley to be found in the area of high grazing pasture to the north of the village of Garenin. This glen runs between the sea cliffs at its west end and the encroaching moorland 500 metres to	Field walking on 1/7/94	medieval

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
		the south east and is a wide U shape in cross section being bounded at its extremes with sharply rising bedrock outcrops. Much of the gently sloping valley floor is covered with well preserved Rig and Furrow standing up to 1.5 metres in height and up to 3 metres in wavelength. Much of the cultivation runs from the valley sides to the Fivig burn, though there are small patches to the north and south east that run parallel to the burn. At the edge of the valley on its north side is a Stone enclosure of sub oval shape oriented north - south and measuring 15 metres by 8 metres internally with an entrance at the north end and a possible hearth and chimney in the east wall. A small subsidiary chamber is built against the east end of the main structure. This D - shaped enclosure is partial collapsed on its east side and has a radius of 4 metres. On the north side of the valley there is the indication of several turf covered enclosures that may indicate other habitational structures, these features will need more investigation during a further survey of the valley.

NB 1900 4292	Shielling		Field walking on 28/9/95	crofting
NB 1867 4278	Shielling		Field walking on 28/9/95	pre-crofting
NB 1957 4456	Shielling and cairn	Oriented west - east, this Shielling survives as one course of masonry protruding through the peat. Measuring 3 metres by 4.5 metres an entrance can be seen in the north wall at the east end. A subsidiary structure measuring 1 metre by 1.5 metres abuts the east end of this structure. To the south is a small L - shaped shelter, and to the west at the foot of the slope on which the site sits a series of placed boulders provide a crossing through a boggy area that blocks the approach to the Shielling from the west. 5	Field walking on 4/7/94	medieval

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
		metres to the south southwest is a cairn that measures 2 metres in diameter.		
NB 2064 4483	Shieling or day shelter		Field walking on 27/9/95	unknown
NB 1893 4311	Shieling?	Measuring 2 metres by 1.5 metres this oval setting of stones sits in the lee of a rock outcrop immediately to the west of loch Allt a Glas. No apparent entrance can be discerned to this enclosure, though within it a possible fireplace can be seen.	Field walking on 7/7/94	post medieval
NB 1910 4499	Shelter	Measuring 1.5 metres in width and 1.75 metres in length this structure is oriented west - east and has walls on three sides being open to the east. The walls have tumbled inwards filling the interior and making the identification of possible hearths, etc. impossible.	Field walking on 1/7/94	unknown
NB 1933 4475	Shelter	Consisting of a short L - Shaped stretch of dry stone wall open facing to the north and east. This shelter is in the immediate vicinity of 17/1 being further down slope to the west.	Field walking on 1/7/94	crofting
NB 1905 4474	Shelter	This shelter comprises an L - shaped dry stone wall position against an L - shaped face of outcrop to produce a totally enclosed chamber. There is no indication of a roof having existed.	Field walking on 1/7/94	crofting
NB 1926 4472	Shelter	This L - Shaped shelter is formed by three large boulders of bed rock linked together with 2 short (0.75 metres long) stretches of dry stone walling. This shelter is open facing to the east and south with good views across the rough grazing in that direction.	Field walking on 1/7/94	crofting
NB 1941 4460	Shelter	The fragmentary remains of this structure consist of a dry stone wall measuring 2.5 metres by 1 metre situated immediately opposite and 2 metres from a large bedrock outcrop. This structure is open at the north and south ends, and there is no evidence to point to these gaps having ever been closed.	Field walking on 4/7/94	unknown
NB 1947 4455	Shelter	This small L - shaped stretch of dry stone wall measures 1 metre by 1.5 metres and is open facing to the west over a large flat area of rough grazing on top of Cnoc an	Field walking on 1/7/94	unknown

Eoin.				
NB 1973 4449	Shelter	This monument survives as an L - shaped stretch of dry stone wall measuring 5 metres by 3 metres and open facing to the northeast. within the monument several stone slabs have been positioned to provide benches looking east and north. This monument is just to the north of NB 1970 4452.	Field walking on 2/7/94	unknown
NB 1941 4372	Shelter	Facing downhill on a south facing hillside is a u- shaped stretch of drystone dyke that measures 5 metres in length and was apparently built to provide shelter from prevailing weather.	Field walking on 2/7/94	unknown
NB 1941 4365	Shelter	Situated on a east facing hillside, and open to the east is a small stretch of drystone wall built in a U- shape apparently to provide shelter. Immediately to the east of this site are a series of square cut lazy beds.	Field walking on 5/7/94	unknown
NB 1928 4432	Shelter/ bothie	Situated just above the west end of the village, looking out over the ocean, this small bothie or shepherds shelter is formed by a dry stone wall built between two large natural boulders. open to the south, the shelter has evidence of remains of a hearth against the bas of the westerly bolder. The whole monument including the boulders is 6 metres by 3 metres, the shelter itself is 2 metres wide and 2 metres deep.	Field walking on 5/7/94	unknown
NB 1974 4490	Shelter/ Shieling	Measuring 1 metre by 2 metres this rectangular dry stone construction is open to the east due to the collapse of the east wall. The floor of the interior of the enclosure has visible stone flagging, but no visible hearth. The is no indication of weather this structure was ever roofed. This monument is in the immediate vicinity of Fivig burn and may be related to the agricultural activities of monument 50/2	Field walking on 2/7/94	crofting
NB 1958 4482	Shelter/ Shieling	This oval shelter of enclosure of dry stone construction oriented north - south measures 2.5 metres in the long axis and has an east facing entrance. internally against the west wall there is a defined circular hearth.	Field walking on 4/7/94	post medieval

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
NB 1944 4489	Shelter/ Shieling	Situated on a south facing slope immediately to the north 20/3 this site comprises one dry stone wall oriented north - south. To the east of this the extents of the structure can be discerned though it is now infilled with peat and earth.	Field walking on 2/7/94	unknown
NB 1944 4486	Shelter/ Shieling	Measuring 2 metres by 3 metres this sub - rectilinear drystone structure sits on a west facing slope in the immediate vicinity of monuments 20/4 and 20/5. within the structure, which is open to the west, are to bench seats constructed in the walls, but no obvious signs of fire place or hearth.	Field walking on 2/7/94	crofting
NB 1970 4466	Shelter/ Shieling	This drystone structure has three walls and is open to the east. Measuring 1 metre in width and 1.5 metres in length the structure has no roof and no evidence to suggest roof was ever-present or otherwise. In the western wall a small fire place has been built with a flue running up through the wall.	Field walking on 1/7/94	unknown
NB 1933 4375	Shelter?	This L - Shaped fragment of drystone wall measures 4 metres north - south and 3.5 metres west to east and has no other associated structures near it.	Field walking on 4/7/94	unknown
NB 1891 4359	Shepherds Shelter	An L - shaped length of wall runs 2 metres before turning through 90 degrees and running a further 2 metres. Situated on top of a low rise and abutted on to a large bedrock boulder this stretch of drystone wall represents a temporary shelter from the prevailing weather.	Field walking on 7/7/94	unknown
NB 1914 4311	Shepherds Shelter	This small rectangular drystone structure measures 4 metres by 3 metres. The north wall has collapsed inwards, filling much of the interior of the structure with rubble. A small gap, possibly an entrance may be seen at the west end of the south wall.	Field walking on 7/7/94	unknown
NB 1990 4349	Spring	Situated at the start of a drainage channel is a collection of large stones that appear to be capping a spring. These stones have now collapsed into the spring.	Field walking on 4/7/94	unknown
NB 1965 4368	Spring?	Sitting on the south west side of a low mound measuring 5 metres in diameter is a large stone measuring 1 metres by 2	Field walking on	unknown

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
		metres. This stone appears to be choked up on smaller stones and may be the cap stone for a spring.	4/7/94	
NB 1870 4335	Steading	Situated immediately to the south of Loch Dubh na Glair are a series of rigs enclosed within a stone dyke. Among the rigs the remains of a stone enclosure or enclosures can be seen, though they are too fragmentary to interpret. To the west of this enclosure on a low rise is a feature that may be the remains of a cist.	Field walking on 7/7/94	medieval
NB 1930 4335	Steading	Situated immediately to the south of Loch Dubh na Glair are a series of rigs enclosed within a stone dyke. Among the rigs the remains of a stone enclosure or enclosures can be seen, though they are too fragmentary to interpret. To the west of this enclosure on a low rise is a feature that may be the remains of a cist.	Field walking on 7/7/94	pre-crofting
NB 1939 4515	Still house	Local folklore holds that in the past an illicit still was operated in this locality. This structure is the only structure in the immediate vicinity that is of any substantial construction. Consisting of dry stone walls with an earth fill, measuring up to 3 metres in thickness and standing up to 1 metre in height this rectilinear D shaped enclosure abuts a south facing rock face and measures 8 metres along the face and 4 metres in width. A doorway survives in the southern wall and immediately opposite, under the rock face, is a pit measuring 1 metre by 0.75 metres that may have housed a hearth. To both the west and east of the main structure subsidiary walls may be seen, and immediately to the south, less than 3 metres from the structures entrance flows a small burn. This structure is less than 20 metres from the sea cliffs, and immediately above a small bay that is reasonably easily accessible by following the stream.	Field walking on 2/7/94	post medieval
NB 1958 4435	Stock Enclosure	Measuring 12 metres by 8 metres this enclosure stands 2 - 2.5 metres high and is of modern dry stone construction. Abutted to it the northern end of the west wall is a second small enclosure measuring 3 metres square, and also of 2 metres in height, with no apparent entrance.	Field walking on 5/7/94	crofting

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
NB 2143 4444	Stone alignment		Field walking on 28/9/95	early prehsitoric
NB 2033 4428	Stone alignment		Field walking on 27/9/95	early prehsitoric
NB 2104 4419	Stone alignment		Field walking on 27/9/95	early prehsitoric
NB 2045 4395	Stone alignment		Field walking on 27/9/95	early prehsitoric
NB 2056 4392	Stone alignment		Field walking on 27/9/95	early prehsitoric
NB 2031 4453	Stone Bridge		Field walking on 28/9/95	crofting
NB 1968 4355	track/road	ElevationL 20m OD Orientation: SE/NW Aspect: All Possible period: Modern Situated on plateau Vegetation cover: Moor Reinforced points of track, points where vehicle would get trapped e.g. drainage ditches/streams		crofting
NB 1971 4370	Trackway	Situated at a wet point on a track that once provided access to a dwelling to the north is a small area of metteling consisting of beach cobbles laid end on, with a neat curb. This stretch of roadway measures 7 metres north to south and 1 metre in width.	Field walking on 4/7/94	pre-crofting
NB 1850 4355	Vegetation change	This change in vegetation manifests itself as a circular area of grass 1.5 metres in diameter that grows lushier and higher than the surrounding grass.	Field walking on 7/7/94	unknown
NB 1965 4467	Wall	This fragmentary stretch of walling runs for 14 metres in a north - south direction across a narrow valley. This wall survives know as only one course of stones, the remainder having been robbed or enveloped in the peat.	Field walking on 4/7/94	unknown
NB 1918 4447	Wall	An alignment of large boulders runs for 16.0 metres in a east to west direction crossing the same coll as NB 1923 4444.	Field walking on 4/7/94	early prehsitoric

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
		This structure may be the remains of a terrace or revetment rather than a field boundary.		
NB 1923 4444	Wall	Situated in the coll between two low rocky peaks this wall spans the width of the gap closing it completely. Running parallel to a modern field boundary this ruinous stone wall stand little over 0.50 metres high and is 1.0 metres wide.	Field walking on 4/7/94	unknown
NB 1918 4434	Wall	The remnants of this dry stone dyke run north - south for 20 metres down the centre of a narrow valley. This monument have undergone heavy erosion or robbing and only the largest stones, partially buried in the peat have survived.		unknown
NB 1860 4412	Wall	The remains of this wall can be traced as sporadic stone protruding for the peat. Running for 70 metres on a south - north direction, it is unclear whether these remains represent the final remains of a wall that sat on top of the peat or whether these remains are of a wall long buried in the peat.	Field walking on 30/6/94	early prehistoric
NB 1864 4394	Wall	Fragmentary remains of this field boundary can be seen following the modern fence line. The wall has largely been destroyed and is present in some places just as occasional stones.	Field walking on 1/7/94	unknown
NB 1868 4368	Wall	The remains of this drystone field boundary extend for 124 metres east from the bottom of a cliff face to the edge of a loch. The wall has gaps in it due to robbing and in two places large outcrops of bedrock have been included in the construction.	Field walking on 7/7/94	unknown
NB 1932 4338	wall	Elevation: 30m OD Orientation: SE/NW Aspect: W/N/E Possible period: Neolithic Situated on valley floor Vegetation cover: Moor Top of wall is buried by peat by approx. 20-30cm therefore the bottom could well be below by approx. 1m and therefore a very old date is proposed. The wall could well have outlying stones upslope to the top of the knoll and also at the loch edge.		unknown
NB 1896 4227	Wall		Field walking on 28/9/95	unknown

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
NB 1918 4378	wall and ditch	Elevation: 40m OD Orientation: NW/SE Aspect: N/E Possible period: Pre-improvement/Post Medieval/Modern Situating on hilltop Vegetation cover: Rough grazing Stone wall making use of bedrock for 7m then dropping to run along the field, with a ditch to the SW upslope running to the boundary wall for 13m and then across the adjacent field. Runs across the field above platforms and drains 27		unknown
NB 1933 4419	wall or bank	Elevation: 20m OD Orientation: N/S Aspect: W/S Possible period: Pre-improvement/Post Medieval/Modern Situating on hillside. Vegetation cover: Rough grazing Bank with low turf-covered stone wall		crofting
NB 1930 4412	wall/bank	Elevation: 25m OD Orientation: NORTHEAST/SW Aspect: E/S/W Possible period: Pre-improvement/Post Medieval/Modern Situating on hillside Vegetation cover: Rough grazing Stone wall 30m long built on top of bedrock. Possibly formed an enclosure running up to field boundary. Now the old stone boundary seems to fall slightly short of the modern fence boundary. Also 4 associated cairns, 2 of which are below the "enclosure/platform" and one seems to have collapsed down slope on which it stood.		crofting
NB 1924 4391	wall/bank and cairn	Elevation: 18m OD Orientation: W/E Aspect: N/W Possible period: Pre-improvement/Post Medieval/Modern Situating on hillside Vegetation cover: Rough grazing Stone wall (6m long) and cairns, 2 of which are approx. 1m across		unknown
NB 1925 4391	wall/bank and cairn	Elevation: 18m OD Orientation: W/E Aspect: N/W Possible period: Pre-improvement/Post Medieval/Modern Situating on hillside Vegetation cover: Rough grazing Stone wall (6m long) and cairns, 2 of which are approx. 1m across		unknown
NB 1923 4403	wall/bank and ditch	Elevation: 10m OD Orientation: N/S Aspect: W Possible period: Pre-improvement/Post Medieval/Modern Situating on hillside Vegetation cover: Rough grazing Dry stone wall with ditch to the E. Wall is heavily denuded in places and joins old dry stone field		crofting

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
		boundary at modern field boundary. 20m long and incorporate bedrock in this construction. Has a small cairn directly on S end		
NB 1985 4485	Wall/promentry fort?	Situated on the east side of the natural promentry of Gob a' Chuthail, this fragmentary wall survives only as one or two courses of stone running over the isthmus of land and up the east facing cliffs on the promentry. accessed along the foot of the cliff on the main land, from the north. Locals suggest that the promentry was used recently as a pen for "Raider" sheep, sheep that raided crop plots in the village. To this end walls of a more recent vintage may be seen on the landward side at the foot of the cliff, blocking access to the promentry by cutting the main path. The wall on the promentry measures 1 metre in width and is over 100 metres in length. No running water source or signs of habitation, other than the wall, can be seen on the site. This stac that this site sits on is marked on both the 1895 Ordnaces survey	Field walking on 1/7/94	later prehsitoric
NB 1962 4468	Wall/Shelter	The now fragmentary remains of this L - shaped fragment of wall measure 3 metres by 2.5 metres and is open facing uphill to the south.		unknown
NB 1935 4405	walls	Elevation: 18m OD Orientation: SE/NW Aspect: S/W Possible period: Pre-improvement/Post Medieval/Modern Situated on hillside Vegetation cover: Rough grazing Wall abutting enclosure 43. Grass is high as ground is very waterlogged so hard to tell full extent of walls. One wall abuts enclosure with 2 other walls running perpendicular to this.		unknown
NB 1931 4392	walls and ditches	Elevation: 12m OD Orientation: NE/SW Aspect N/E Possible period: Pre-improvement/Post Medieval/Modern Situated on hillside Vegetation cover: Rough grazing Turf covered drystone walls, some with associated drainage ditches. One abuts enclosure 37. Also cairn below outcrop of bedrock.		unknown
NB 1921 4372	walls or banks	Elevation: 37m OD Orientation: N/S Aspect:N/S Possible period: Pre-improvement/Post Medieval/Modern		unknown

<i>NGR</i>	<i>Classific.</i>	<i>Description</i>	<i>Reference</i>	<i>Period</i>
		Situated on hilltop Vegetation cover: Rough grazing Stone walls revetted to SE side. This same SE wall formed the field boundary and the modern field boundary has gone and old boundary is left in denuded form. Is mapped on ordnance survey map but not in its entirety. Possibly a pen of some sort. Associated with 2 cairns		
NB 2044 4399	Well or spring		Field walking on 27/9/95	unknown

Table 4: Recent excavations in Lewis

After Burgess and Church 1997 (with modifications)

<i>SITE NAME, NGR, (PARISH)</i>	<i>DESCRIPTION</i>
Tolanais, Baile na Cille NB 045 338 (Uig)	Two mounds proved to be natural but each had a cairn on top that is possibly Bronze Age in date and a boat naust that is thought to be medieval (McLeod 1995a, 1995b).
Berero NB 045 344 (Uig)	Deserted settlement, and early abandoned and dismantled blackhouse believed to date to the 1600s (Burgess et al. 1996b).
An Dunan NB 046 346 (Uig)	Causewayed, utilised natural islet located in saltings at the north end of Traigh na Surban. Probably Bronze Age (Burgess et al. 1996a).
Gob Eirer NB 033 339 (Uig)	Promontory enclosure, situated on a low coastal stack on the north shore of Camas Uig with evidence of two rectangular houses within the enclosure that may date to the Norse or early medieval periods. (Burgess et al. 1996d).
Guinnesso NB 035 363 (Uig)	Relict landscape with large poly-cellular features, cultivation and industrial features. Upper layers are probably medieval, but it is thought that lower layers are Bronze Age or early Iron Age in date (Burgess et al. 1996e and Gilmour <i>et al</i> 1997).
Loch na Berie NB 103 351 (Uig)	Broch tower on the edge of Loch na Berie behind Traigh na Berie. Excavations since 1985 have revealed multi-period settlement and re-occupation of the broch at first floor levels, including cellular phases and a smaller round house. There is no evidence for continuity into the Norse period (Harding and Armit 1987, 60-61; 1988, 31-32; 1990 71-107; Harding 1993, 110; Harding <i>et al</i> 1994, 98 ; 1995, 111).
Dun Bharabhat, NB 098 353 (Uig)	Complex Atlantic round house on an island in Loch Bharabhat more than 50 metres above Loch na Berie and to the west in rough rocky hilly terrain. Multi-period occupation (Harding and Armit 1990, 71-107).
Cnip II and III	Iron Age metalworking site, linear re-use of the entrance of a

<i>SITE NAME, NGR, (PARISH)</i>	<i>DESCRIPTION</i>
NB 097 366 (Uig)	wheelhouse (Cnip phase 1). (Armit and Dunwell 1992, CFA 1992b, 83)
Cnip I NB 098 366 (Uig)	Iron Age wheelhouse and later structures (Harding and Armit 1990, Armit 1988c, 30).
Cnip headland NB 099 364 (Uig)	Viking cemetery, eroding out of the headland between Cnip and Traigh na Berie (Welander <i>et al.</i> 1987; Dunwell and Neighbour. 1995 CFA 1992a, 83; 1994, 96).
Cnip headland NB 099 365 (Uig)	Cist burial (late Neolithic or early Iron Age), contained Beaker pottery (CFA 1992c, 83 and Dunwell and Neighbour 1995).
Cnip headland NB 099 364 (Uig)	Bronze Age kerbed cairns and associated palaeosols (Close-Brooks 1995).
Bostadh NB 137 401 (Uig)	Late Iron Age and Norse settlement eroding in machair on Bostadh Beach, Great Bernera. Excavations revealed the partial remains of a linear Norse house and associated middens. These were underpinned by figure of eight round houses of late Iron Age date. These poly-cellular structures incorporate and overlies earlier cellular features (Neighbour and Burgess 1996).
Tob nan Leobag NB 219 326 (Uig)	Early prehistoric sub-peat field system and possible settlement on a promontory of land running south from Calanais Farm. (Cowie pers comm.)
Cnoc an Tursa NB 213 329 (Uig)	Excavations on the end of the south alignment of the Calanais Stones revealed several possible stone holes in the same alignment and a possible ritual enclosure (Coles 1993, 110 and Coles and Rees 1994, 96).
Aird Calanais NB 210340 (Uig)	Excavations of a turf-built shieling, material culture including a brooch suggests a post-medieval date (Coles and Burgess 1994, 96) .
Carnan, Calanais, NB 265 325 (Uig)	Excavations on two cellular turf shielings on the black lands to the east of Calanais revealed multi-phase buildings of possibly medieval and earlier date, with successive hearth that were sampled for dating. One stone gaming piece was retrieved from these hearths that may have parallels in the Iron Age (R Miket pers comm, unreported excavation).

<i>SITE NAME, NGR, (PARISH)</i>	<i>DESCRIPTION</i>
Olcote Cairn, Breasclete NB 217 347 (Uig)	Excavation of a kerb cairn and quartz scatter, threatened by the widening of the main road at Breasclete, revealed an old ground surface with many ard marks and features beneath the cairn (Neighbour 1996, 112).
Cidhe Carloway NB 192 421 (Uig)	Investigation of the remains of the Dun at Carloway Pier prior to reworking of the pier and the total destruction of the site (Andrain and Dixon 1992, 83).
Garenin NB 1869 4500 (Uig)	Promontory enclosure with platform scoops. Circular stone structures appear to be underlain by pits for a post-built structure (Burgess and Gilmour 1995).
Garenin NB 1948 4510 (Uig)	Two illicit stills, of medieval or post- medieval date. One is underlain by a sub-rectangular structure which has prehistoric pottery similar to that seen at Dun Bharbhat excavations (Burgess and Gilmour 1995).
Garenin NB 180 449 (Uig)	3 Blackhouses were tested for evidence of central hearths and to examine construction techniques (Burgess 1995).
Garenin NB 180 449	A corn drying kiln was excavated, revealing evidence of a least three phases of use (Burgess and Gilmour 1995).
Dalmore NB 216 452 (Uig)	Middens and settlement of late Neolithic and Early Bronze Age date (Ponting and Ponting 1984 and Sharples 1984).
Barvas NB 348 518 (Barvas)	Multi-phase early prehistoric settlement with later burials (Cowie 1986, 1987).
Barvas NB 348 518 (Barvas)	Multi-phase Norse settlement, excavation of middens and external features did not disturb or examine the house structures on the site, which remain intact (Cowie pers comm.).
Galson NB 437 594 (Barvas)	Iron Age long cist burials and multi-phase settlement (Neighbour and Knott 1996, 104).
Broad Bay NB 478 322 (Stornoway)	Mass graves found during road widening. Coins date the site to 1688. The nature of the graves suggests drowning victims rather than local residents (McCullagh 1989, 71).
Achmore stone circle NB 317 292 (Lochs)	Excavation of a tooled wooden stake and a possibly Bronze Age pot in peat cuttings surrounding Achmore stone circle (Church 1996, 105 and Burgess et al 1996g, 105).

CEA(L) FIELDS USED IN THE PENMAP RECORDING SYSTEM

FIELD NAME	OPTION	DESCRIPTION AND CONVENTIONS
Parcel	Input data	Based on map sheet.
Monument number / label	Input data	Generation through position in specific map sheet (Historic Scotland 1996, p13)
Site name	Input data	Only given if site has a recognised and accepted name, either by local tradition, by the Ordnance Survey or by the Royal Commission.
Locale	Input data	Nearest locality on 1:25000 OS map (in Gaelic).
Situation	Pick list	Position of site in landscape.
Structural elements	Pick list	Principal type of site. Sites with multiple types are further described by <i>Other structural elements</i> or on paper.
Other structural element	Input data	Site type or further description not covered by <i>Structural Element</i> field.
Dimensions	Input data	Dimensions of entire site coverage described by x (maximum length), y (maximum breadth) and z (maximum height or depth) axes. When different conventions to this are used they are described in field or text.
Orientation	Input data	Gives orientation along x axis with both compass points given (e.g. n to s). Also each of the four major points are abbreviated to their first letter with composite points hyphenated (e.g. n-e equals north-east.)
Artefact elements	Pick list	Describes principal artefactual components seen in site.
Other artefact elements	Input data	Describes further artefactual components not covered by <i>Artefact elements</i> .
Matrix state	Pick list	Both <i>Site state</i> and <i>Matrix state</i> describe the erosion state of the site and matrix respectively, using the categories outlined by Ashmore (Historic Scotland 1996, p14). These two fields replace the single field 'Condition' outlined by Ashmore (Historic Scotland 1996, p14).
Site state	Pick list	See above.
Date visited	Input data	Allows <i>Matrix state</i> and <i>Site state</i> to be assessed within the annual erosion regime of Lewis.
Aspect	Input data	This is described by giving the first compass point followed by the last compass point, then the clockwise direction indicated by the next principal compass point the aspect runs through (e.g. n to s through e).
Period	Pick list	This indicates the possible age of the site, as identified by the survey team of each site. This is given by general periods as opposed to numerical chronology due to the uncertain numerical chronologies of many of the site types in this region
Recommended action	Pick list	Decided initially in field by survey teams with further consideration given during post-ex.

For full details of this system see Burgess and Church 1997, 432-438

Table 45: Count of monument classes recorded as part of the Cea(L) survey

<i>Classification</i>	<i>number of records</i>
Atlantic round house	13
Blackhouse	45
Burial	28
Cairn	153
Cell	64
Communications	21
Cultivation	185
Dyke	315
Ecclesiastical	169
Enclosure	1
Field-system	22
Habitation enclosure	98
Industry	172
Man-made islands	36
Marine industry	36
Military	114
Mill	12
Miscellaneous	22
Platforms	68
Promontory enclosures	3
Rock carvings	3
Settlement	16
Settlement mounds	69
Shieling	11
Souterrains	26
Stone settings/ standing stones	3
Stray finds	82
Sub-peat features	63
Utilised natural islands	53
Wells	7

APPENDIX 7: TABLES RELATING TO CALANAIS (WLLP)

Table 43: Gazetteer of sites recorded at Calanais (WLLP)

Sorted by classification and then by grid reference.

<i>NGR</i>	<i>Locale</i>	<i>Classification</i>	<i>Description</i>	<i>Period</i>
NB 20960 32980	Calanais	Blackhouse	Blackhouse	Pre Clearance
NB 21060 33570	Calanais	Blackhouse	remains of small blackhouse measures 5.5x4m	Post Medieval
NB 21150 32950	Calanais	Blackhouse	early blackhouses	Post Medieval
NB 21200 35150	Breasclete	Blackhouse	Blackhouse	Crofting
NB 21240 32920	Calanais	Blackhouse	poly cellular blackhouses	Post Medieval
NB 21280 32810	Calanais	Blackhouse	remains of blackhouse including cobbled floor	unknown
NB 21280 33200	Calanais	Blackhouse	stone built blackhouse	crofting
NB 21290 33400	Calanais	Blackhouse	cultivation and blackhouse	unknown
NB 21330 32900	Calanais	Blackhouse	partial remains of blackhouse	Post Medieval
NB 21330 33610	Calanais	Blackhouse	multi-phase blackhouse with partial remains of barn and large in-field	crofting
NB 21340 32870	Calanais	Blackhouse	turf remains of blackhouse	unknown
NB 21350 33450	Calanais	Blackhouse	stone and earth remains of a blackhouse	Post Medieval
NB 21360 32940	Calanais	Blackhouse	remains of blackhouse	Post Medieval
NB 21360 33350	Calanais	Blackhouse	two blackhouses with common wall, one has small barn.	Post Medieval
NB 21450 33010	Calanais	Blackhouse	blackhouse surrounded by square cut cultivation	crofting
NB 21830 33120	Calanais	Blackhouse	blackhouse	crofting

<i>NGR</i>	<i>Locale</i>	<i>Classification</i>	<i>Description</i>	<i>Period</i>
NB 21830 33180	Calanais	Blackhouse	remains of blackhouse and associated potato field	crofting
NB 21840 33170	Calanais	Blackhouse	precrofting blackhouse, polycellular layout.	Post Medieval
NB 21880 33130	Calanais	Blackhouse	remains of blackhouse	crofting
NB 21350 32990	Calanais	Burial	chambered tomb in centre of the Calanais stones	Neolithic
NB 20190 33040	Calanais	Cairn	constructed of large stones	unknown
NB 20380 36020	Breasclete	Cairn	Cairn	Post Medieval
NB 20520 33600	Calanais	Cairn	Cairn	Unknown
NB 20530 33160	Calanais	Cairn	Cairn	Unknown
NB 20860 33090	Calanais	Cairn	Cairn	Prehistoric
NB 20890 33870	Calanais	Cairn	small cairn on hill top	Modern?
NB 21020 33210	Calanais	Cairn	two cairns	unknown
NB 21020 33350	Calanais	Cairn	on small hill top measures 3.5 m diameter	unknown
NB 21030 33330	Calanais	Cairn	rigging and small cairn	unknown
NB 21040 33420	Calanais	Cairn	small arrangement of stones buried in the peat	unknown
NB 21050 33380	Calanais	Cairn	rigging and cairns	unknown
NB 21050 33420	Calanais	Cairn	wall, cairn and day shelter	unknown
NB 21070 34070	Calanais	Cairn	in slight hollow, possible fire place	unknown
NB 21070 34160	Calanais	Cairn	Stone dyke and cairn	post-medieval
NB 21120 33580	Calanais	Cairn	cairn measures 2x1.5m	unknown
NB 21130 33140	Calanais	Cairn	rigging and cairn	unknown
NB 21160 33370	Calanais	Cairn	cultivation and irregular cairns	unknown
NB 21170 33100	Calanais	Cairn	12 clearance cairns	unknown
NB 21210 33860	Calanais	Cairn	1m x .5m	unknown

<i>NGR</i>	<i>Locale</i>	<i>Classification</i>	<i>Description</i>	<i>Period</i>
NB 21220 33920	Calanais	Cairn	small well built cairn	unknown
NB 21260 33280	Calanais	Cairn	4 irregular stone and turf mounds	unknown
NB 21460 33220	Calanais	Cairn	stone mound, u-shaped, 4.5 x 12 metres	unknown
NB 21470 33550	Calanais	Cairn	rigging and clearance cairns	unknown
NB 21490 32920	Calanais	Cairn	small clearance cairn	Modern
NB 21500 33450	Calanais	Cairn	cultivation and cairns	unknown
NB 21680 32360	Tob nan Leobag	Cairn	Cairn	Pre Clearance
NB 21680 33560	Calanais	Cairn	three mounds of cairns forming a U shaped feature 6 x4 metres	unknown
NB 21690 33790	Calanais	Cairn	Cairn	Modern
NB 21750 32360	Tob nan Leobag	Cairn	cairn or possible building	post-medieval
NB 21880 32460	Tob nan Leobag	Cairn	cairn buried in peat	post-medieval
NB 21890 32520	Tob nan Leobag	Cairn	lazy beds and cairns	post-medieval
NB 22030 34220	Calanais	Cairn	alignment of stones terminating in small cairn	unknown
NB 22040 33630	Calanais	Cairn	cairn measures 2x2 metres	unknown
NB 22060 34480	Calanais	Cairn	large clearance cairn including boulders	unknown
NB 22230 34500	Calanais	Cairn	series of cairns consisting of small stones topped by one large stone	unknown
NB 22680 33970	Calanais	Cairn	oval shieling, 4.5x3 metres with small cairn at centre	unknown
NB 22830 34000	Calanais	Cairn	small cairn on bedrock	unknown
NB 22900 32900	Calanais	Cairn	possible long cairn consisting of peat and turf over stones	unknown
NB 23180 31490	Garynahine	Cairn	Cairn	Post Medieval
NB 24110 33660	Calanais	Cairn	small collection of stones on	unknown

<i>NGR</i>	<i>Locale</i>	<i>Classification</i>	<i>Description</i>	<i>Period</i>
			prominent knoll	
NB 24200 33190	Calanais	Cairn	small collection of stones on prominent knoll	unknown
NB 24430 33810	Calanais	Cairn	slight remains of curvilinear shieling measures 3x2 metres, next to remains of cairn	unknown
NB 24550 33990	Calanais	Cairn	linear clearance cairn? On edge of bedrock	unknown
NB 26610 31550	Calanais	Cairn	Possible shieling remains, rectilinear stone, buried in peat, 3x2 metres, immediately adjacent to a cairn	unknown
NB 27540 32070	Flodavat	Cairn	rectilinear cairn 1.5x1 metres	unknown
NB 28280 32300	Calanais	Cairn	Possible circular shieling, stone built, and adjacent cairn	unknown
NB 28320 33570	Calanais	Cairn	small cairn	unknown
NB 28370 33670	Calanais	Cairn	small cairn	unknown
NB 28460 31800	Calanais	Cairn	cairn buried in peat 0.5x0.5 metres	Prehistoric ?
NB 20390 35830	Breasclete	Cellular Structure	Cell	Post Medieval
NB 20470 33160	Calanais	Cellular Structure	Cell, turf built	Unknown
NB 20500 33170	Calanais	Cellular Structure	promontory with many feannags and possible cellular structure	Unknown
NB 20530 33160	Calanais	Cellular Structure	3 Cell	Prehistoric
NB 20690 33430	Calanais	Cellular Structure	two possible cells on hill top	Unknown
NB 21310 33350	Calanais	Cellular Structure	possible early blackhouse 8x6 metres with entrance in the end wall, nearby circular stone structure 2.5 metres in diameter	unknown
NB 21440 33200	Calanais	Cellular Structure	structure constructed of small stones and pebbles 2.5 x 3 metres	unknown
NB 21730 32600	Tob nan Leobag	Cellular Structure	Cell	Unknown
NB 24960 31820	Calanais	Cellular Structure	small stone circular cell 1 metre in diameter	unknown

<i>NGR</i>	<i>Locale</i>	<i>Classification</i>	<i>Description</i>	<i>Period</i>

APPENDIX 8: TABLES RELATING TO AIRD UIG (ULS)

Table 39: Gazetteer of sites recorded at Aird Uig (ULS)

After Burgess and Church 1996 (with small amendments)

Sorted by classification and then by grid reference

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
NB 0532 3308	"sea wall"	Defensive wall protecting machair from sea. Fell into disrepair in many places and subsequent erosion has occurred.	Field walking 08.4.95, O.S. Present edition 1:10000 map
NB 0993 3643	Artefacts	2 scatters of pottery in vicinity of the Norse cemetery situated at the summit of Sron Cnip. 1 scatter was associated with a concentration of shells so may represent a midden; both imply prehistoric activity in the area. The erosion in the area is particularly severe, with slumping and sand deflation covering up the machair grass. Both sites are unstable.	Field walking 10.4.95; Armit (1994), site 15
NB 0477 3411	Artefacts	Small fragments of hand made pottery were found in an erosion scar that is cut into a hand dug lazy bed at this grid reference. No diagnostic pieces were recovered and it is certain that these pieces were re deposited in the bed either from a local site or due to manuring.	Field walking 29.3.95
NB 0497 3375	Artefacts	Noted in the NMRS as pottery eroding from rabbit scrapes and observed on the ground.	Field walking 07.4.95, RCAHMS NMRS NB 03 SE 17
NB 0503 3329	Artefacts	Noted in the NMRS as pottery eroding from rabbit scrapes and observed on the ground.	Field walking 07.4.95, RCAHMS NMRS NB 03 SE 18
NB 0467 3673	Artificial island/Crannog	This artificial island is completely submerged in the north west corner of Loch Mheacleit. A causeway can be seen to the west of the site though it is heavily silted up. This site consists mostly small irregular rocks and stones and measures 11.0 metres in diameter. Several islands in this loch are modified by humans though all appear to be	Diving 4.4.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		modern features.	
NB 0519 3534	Bank and Cairn	This monument is represented by a curved length of bank that runs for 100 metres starting in an easterly direction and ending up running south. This bank is of turf construction and measure 0.5 metres in thickness. At the west end of the bank there is a large pile of loose stones.	Field walking 30.3.95
NB 0519 3534	Bank and Cairn	This monument is represented by a curved length of bank that runs for 100 metres starting in an easterly direction and ending up running south. This bank is of turf construction and measure 0.5 metres in thickness. At the west end of the bank there is a large pile of loose stones.	Field walking 30.3.95
NB 0342 3534	Bank/erosion feature	This 8.0 metre long feature may be the result of water erosion from a nearby water course.	Field walking 25.3.95
NB 0480 3520	Blackhouse	Situated on a hilltop near grazing and cultivated land (to the east) this structure measures 16.0 metres north - south and 5.0 metres east - west. It is constructed of turf and stone. An internal division can be seen near the south end of the site. To the west of the north end of the monument is an area of disturbed ground that may represent further structures related to the main house.	Field walking 28.3.95, O.S. Present edition 1:10000 maps.
NB 0438 3472	Blackhouse	This blackhouse is of stone construction and measures 15.0 metres west - east and 8.0 metres north to south. No internal divisions can be seen within the structure, but two D-shaped enclosures can be seen on the exterior of the building. The first is situated at the east end of the north wall and measures 10.0 metres east - west and 3.0 metres north - south. The second is situated at the west end of the south wall and measures 5.0 metres west - east and 4.0 metres north - south. An entrance leads from each of these enclosures into the interior of the main structure.	Field walking 30.3.95
NB 0475 3465	Blackhouse	Lying on the east shore of the Triagh nan Sruban is this pre clearance blackhouse that survives as a turf and earth bank enclosure measuring 10.0 metres west - east and 4.5 metres north - south. There are no visible internal divisions within this structure and not attached external structures. There is an entrance to this structure at the west end of the north wall. Adjacent and to the south of	Field walking 26.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		this building is an enclosed area marked out by orthostatic stones that may be a kale or stack yard.	
NB 0495 3460	Blackhouse	Situated next to a stream, this blackhouse consists of two houses built against each other. Orientated north - south, the southern dwelling has an entrance in its east wall. The northern dwelling has an entrance in the centre of its north wall.	Field walking 27.3.95
NB 0475 3456	Blackhouse	This Turf and stone blackhouse stands up to 1.5 metres high, is rectilinear and measures 16.0 x 6.5 metres. There is an entrance in the centre of the east wall. Within the structure there is one sub division, stone built after the original construction creating a small room in the north end of the structure.	Field walking 27.3.95
NB 0475 3455	Blackhouse	Blackhouse	Field walking 26.3.95
NB 0470 3453	Blackhouse	Measuring 7.0 x 13.0 metres this turf blackhouse has a smaller structure measuring 7.0 x 3.5 metres attached to the north end of the east wall. This second structure appears to be roughly contemporary to the main dwelling and houses a small circular kiln measuring 1.2 metres in diameter. There is an entrance between the main dwelling and this ancillary structure.	Field walking 26.3.95
NB 0466 3448	Blackhouse	This blackhouse and associated kale yard is part of the cluster of houses including monuments 221. This site is discussed in detail in section 2.	Field walking 27.3.95
NB 0459 3445	Blackhouse	This pair of blackhouses, Orientated north - south share a common wall. The western one measures 12.0 x 5.0 metres and the eastern one measures 5.0 x 7.0 metres. both structures have attached barns. The eastern structure is the earlier of the two with the western on being built on to it.	Field walking 05.4.95
NB 0461 3445	Blackhouse	This poly - cellular blackhouse consists of 4 enclosures of which three are domestic and one is agricultural. The main blackhouse measures 9.0 x 4.6 metres, is Orientated north - south and has one later internal division at the south end of the structure. The only entrance to this house is at the north end of the east wall and opens into a later structure that is built onto the east wall	Field walking 05.4.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		of the house and is possibly a barn. To the south of this structure is a third structure is built against the south-east structure of the house. To the south is a kale yard measuring 22.0 metres north - south and 15.0 metres west - east. A full description of this site and all the other structures in the abandoned village on the east shore of Traigh nan Sruban in section 2. Field walking 05.4.95	
NB 0461 3445	Blackhouse	This house survives only as an enclosure of evenly spaced large rocks that made up the footings of the walls.	Field walking 05.4.95
NB 0465 3445	Blackhouse	Measuring 11.0 x 5.0 metres this blackhouse is part of the deserted village on the east shore of Traigh nan Sruban. This structure has opposing entrances on its east and west walls and survives as an earth core of a two faced earth cored construction. The only internal feature to this structure is an ambry situated in the east wall immediately to the north of the door in that wall.	Field walking 31.3.95
NB 0352 3381	Blackhouse	Measuring 8.0 metres south-west - north-east and 5.5 metres south-east - north-west This dry-stone structure stands to a height of 1.25 metres. The south-westerly end is slightly apsidal and the opposite end of the structure has a small secondary enclosure built against it measuring 2.0 metres by 5.0 metres. This secondary enclosure stands no higher than 0.20 metres high.	Field walking 30.3.95
NB 0576 3285	Blackhouse	This blackhouse, is shorter and more randomly shaped than one might expect for such a site measuring 8.0 x 6.5 metres. Constructed of dry-stone the walls stand to 1.5 metres and are highly vegetated.	Field walking 08.4.95
NB 0492 3275	Blackhouse	This recent blackhouse measures 14.0 x 7.0 metres and stands up to 1.5 metres in height. Constructed of a double faced earth core wall the roof has been removed and the walls are starting to collapse.	Field walking 08.4.95
NB 0492 3275	Blackhouse	This recent blackhouse measures 8.0 x 5.0 metres and shows evidence of being situated on the site of an earlier undefined structure.	Field walking 08.4.95
NB 0485 3390	Blackhouse/chapel	This rectilinear structure measures 9.0 x 4.0 metres and is Orientated north - south. The walls are of dry-stone construction surviving up to 1.3 metres high and 0.8 metres wide. The presence of a manse on the map may	Field walking 31.3.95, O.S. present edition 1:10000 map.

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		suggest that this is the site of an old church backed up against a bedrock ridge though from its form it could just as easily be a pre crofting blackhouse.	
NB 0452 3516	Blackhouse/ settlement	This structure measures 10.0 metres north - south and 5.0 metres west - east. It is rectilinear in shape and is cut into the ground at its north end; the south end is apsidal. The walls are constructed of soil, stone and turf and are 1.5 metres in thickness. One internal division may be seen but no entrance into either chamber can be defined.	Field walking 29.3.95
NB 0434 3502	Blackhouse/ Settlement/ Shieling	This structure is situated on the south-west facing slopes above Loch Barabhat and measures 7.0 x 4.0 metres. Two cells may be seen internally, both of which measure 3.0 metres square and are entered by doors in the south wall. The northern cell also has a second entrance opposing the first in the west wall. The construction is of turf and soil.	Field walking 29.3.95
NB 0325 3453	Boat landing	This boat landing makes use of natural bedrock and back slope on the south side of Loch Buiale nan Caorach. This natural feature is paralleled by a stone wall which goes out into the loch for 8.0 metres. The wall is constructed of a single course of large stones.	Field walking 30.3.95
NB 0515 3920	Building	Situated on the highest ground on the cliffs above the north end of the Aird Uig Peninsula, within the boundary of the RAF base, this building is of stone and mortar construction. Measuring 5 metres by 3.5 metres, it stands up to its original height of 2.5 metres. Consists of two chambers of equal size, the first being an open courtyard area and the second, entered from the first, was originally roofed though the roof has since been removed. It is likely that this structure was part of a radar and listening post built on this site during World War 2. This structure is located on an older structure, the remains of which can be seen as foundations. This sub-rectilinear, cellular structure measures 3 metres square and has a small annex on its south side measuring 2 metres square. This monument sits less than 10 metres to the north of monument 2.	Field walking 11.4.95
NB 0578 3894	Building	A series of recent military building may be	Field walking

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		seen at this site. These buildings have not been measured, and represent the immediate precursor of the modern military activity on the site. The buildings include the remains of what appear to be fuel bunkers for a very large generator and the tether blocks for guys that supported a mast or aerial that was situated on the roof. These buildings were constructed after 1960.	11.4.95
NB 0449 3766	Buildings and ditch	These two old RAF buildings are 286 metres apart and are linked by a ditch 0.5 metres wide that may have been a conduit for communications or services between the two structures. These buildings are of concrete and flat roof construction and housed transmission and generation equipment. They are marked on the present Ordnance Survey 1:10000 map.	Field walking 28.3.95, Ordnance Survey. Present edition 1:10000
NB 0400 3780	Burial	This small grave is Orientated north - south and measures 1.0 x 0.5 metres. Constructed of regular square stones it has an unmarked headstone at its south end. 5.0 metres to the north is a small setting of edge set slabs measuring 0.7 metres square. This setting may be a hearth.	Field walking 28.3.95
NB 0348 3642	Burial	Situated immediately above west facing sea cliffs is a burial marked by a 0.30 metre headstone and foot stone. This burial is about 2.0 metre long and set back from the cliffs by a bout 2 metres. This feature is typical of 19th and early 20th century burials of victims of drowning found all along the west coast of Lewis.	Field walking 27.3.95
NB 0990 3630	Burial	Arrangement of stones within an actively eroding sand deflation scar that may represent the end of a grave and rests on top of a palaeosol; possibly the same one noted under the kerb cairn immediately to the north (monument 60).	Field walking 10.4.95
NB 0492 3870	Cairn	This cairn measures 3.0 metres by 2.5 metres and appears to have a bank running from it for 10 metres in a westerly direction. It stands up to 0.50 metres in height. Small stones can be seen to be eroding out from the top of the monument.	Field walking 11.4.95
NB 0375 3810	Cairn	This small kerbed cairn measures 1.5 metres in diameter and is constructed largely of small stones with a small pile of larger stones at its centre.	Field walking 28.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
NB 0587 3792	Cairn	This tiny cairn is a modern walkers' cairn and is situated to the south east of the modern trig point.	Field walking 25.3.95, Ordnance Survey. Present edition 1:10000.
NB 0386 3786	Cairn	This triangular walkers' cairn has sides 1.0 metres long and is 1.2 m. high.	Field walking 28.3.95
NB 0570 3778	Cairn	This small cairn measures 1.0 metres in diameter and is 0.5 metres high. This feature appears to be modern.	Field walking 24.3.95
NB 0370 3745	Cairn	This circular cairn measuring 2.0 metres in diameter and appears not to be a modern feature.	Field walking 28.3.95
NB 0366 3731	Cairn	This small cairn measures 0.5 metres in diameter and has a wooden post set in its centre.	Field walking 24.3.95
NB 0375 3700	Cairn	This small cairn measures 1.5 x 0.75 metres and stands 0.6 metres tall. It is covered with moss suggesting that it is not a recent feature.	Field walking 28.3.95
NB 0345 3690	Cairn	Modern Cairn measuring 1.5 metres square.	Field walking 28.3.95
NB 0495 3610	Cairn	This small cairn measures 0.5 metre in diameter and is constructed of 5 large slabs of stone.	Field walking 29.3.95
NB 0449 3607	Cairn	This small cairn is roughly circular and measures 1.0 metres in diameter.	Field walking 25.3.95
NB 0448 3595	Cairn	This small cairn measures 0.80 metres in diameter and appears to be modern.	Field walking 28.3.95
NB 0504 3585	Cairn	Consisting of 4-6 slabs of rock this cairn measures 1.0 metre in diameter.	Field walking 29.3.95
NB 0541 3581	Cairn	This modern walkers' cairn measures 0.5 metres square and is 0.6 metres high.	Field walking 27.3.95
NB 0840 3580	Cairn	Cairn field	Armit 1994
NB 0376 3578	Cairn	This walkers' cairn measures 0.75 x 0.5 x 0.5 metres.	Field walking 25.3.95
NB 0603 3553	Cairn	This small walkers' cairn is constructed of only three stones and stands to 1.0 metres	Field walking

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		high and is 1.0 metre square.	27.3.95
NB 0480 3525	Cairn	This walkers' cairn is situated on a hilltop and measures 1.0 metres square.	Field walking 28.3.95
NB 0345 3512	Cairn	Hill walkers' cairn, 1.0 metres diameter, 1.5 metres high.	Field walking 25.3.95
NB 0825 3512	Cairn	This modern cairn measures 1.0 metres square and stands 2.0 metres high.	Field walking 11.4.95
NB 0830 3512	Cairn	This walkers' cairn measures 1.0 metres in diameter and stands 1.6 metres high.	Field walking 31.3.95
NB 0830 3507	Cairn	Measuring 1.0 metres in diameter this circular setting of stones is the basis of a modern walkers' cairn.	Field walking 31.3.95
NB 0293 3464	Cairn	Situated on the top of Lingal Mor , this cairn measures 2.0 metres in diameter and is constructed of several stones over 1.0 metres in length and many smaller stones.	Field walking 28.3.95
NB 0331 3461	Cairn	The remains of this small circular cairn measure 2.0 metres in diameter.	Field walking 27.3.95
NB 0505 3460	Cairn	This small cairn measures 0.5 metres in diameter and stands just to the west of a rectangular depression that measure s 3.0 x 4.0 metres.	Field walking 29.3.95
NB 0670 3460	Cairn	This stone is 1.0 metres high, 0.5 metres in diameter and consists of small stones.	Field walking 27.3.95
NB 0471 3456	Cairn	This earthen mound contains lots of smallish stones protruding from the surface measures 3.0 metres in diameter.	Field walking 27.3.95
NB 0385 3441	Cairn	These two small cairns are situated 3.0 metres apart and measure less than 1.0 metres in diameter.	Field walking 30.3.95
NB 0324 3440	Cairn	This very denuded cairn measure 1.2 x 0.7 metres and consists of a scatter of irregular sized rocks.	Field walking 30.3.95
NB 0255 3415	Cairn	This cairn is situated on south facing sea cliffs on the south side of Sheilavig hill. Measuring 3.0 metres in diameter the monument is partially covered with grass and other vegetation.	Field walking 28.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
NB 0308 3414	Cairn	Small platform of stones with 4 large corner stones and smaller stones filling in the rectangle. This feature looks like the base of a cairn which has been heavily denuded now measures 1.0 x 1.2 metres.	Field walking 28.3.95
NB 0520 3435	Cairn or shieling	This kerbed cairn or shieling measures 3.0 x 2.9 metres and stands 0.3 metres high. The centre of this feature is filled with earth and stones and is covered with grass.	Field walking 30.3.95
NB 0380 3810	Cairn/cell	This rectangular walkers' cairn measures 1.5 x 2.0 metres and is 0.2 metres high. This cairn is constructed within a sub-circular setting of stones that may be a cell related to the chapel, monument 17.	Field walking 28.3.95
NB 0385 3785	Cairn/cell	This small rectangular walkers' cairn measures 1.0 x 0.5 metres and 0.5 metres high. This feature sits within a sub rectilinear setting of stones measuring 2.0 x 3.0 metres which maybe a cell related to monument 17 (Chapel).	Field walking 28.3.95
NB 0560 3750	Cairn/shieling	This sub-circular stone feature measures 10.0 metres north-west - south-east and 13.0 metres south-west - north-east. It cannot be easily interpreted due to peat that is covering it.	Field walking 24.3.95
NB 0324 3442	Cairn/shieling	This cairn is roughly circular and measures 4.0 metres in diameter. consisting of a grass covered mound with a smaller stone cairn 2.0 metres in diameter on its top it is possible that this feature is actually a shieling with a more modern cairn situated on top of it.	Field walking 29.3.95
NB 0493 3357	Cairn/shieling	This grass covered oval feature on a hilltop measures 2.5 x 2.0 metres.	Field walking 07.4.95
NB 0458 3390	Cairn?	This high round topped mound with stones protruding from its summit measures 3.0 x 6.0 metres and stands 3.0 metres high. It is likely that this feature is either a comparatively modern dump or a natural feature.	Field walking 29.3.95
NB 0420 3770	Cairns	These two small clearance cairns are situated 3.0 metres apart; the southern one measures 0.6 metres and the northern one measures 1.0 metres in diameter.	Field walking 28.3.95
NB 0529 3741	Cairns	These two cairns measuring 5.0 x 7.0 metres	Field walking

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		and 10.0 x 5.0 metres are found within the confines of peat cutting activity and may be stone removed from the cuttings as they were exploited.	24.3.95
NB 0454 3388	Cairns	These two cairns are situated on a ridge above the east shore of Traigh nan Sruban, less than 2.0 metres apart. the westerly site measures 1.3 x 1.2 metres and the easterly site measures 1.0 metre in diameter.	Field walking 29.3.95
NB 0435 3450	Causeway	This small stone causeway across a stream on the mud flats of Traigh nan Sruban measures 3.0 x 1.5 metres.	Field walking 30.3.95
NB 0465 3450	Causeway	This small boulder construction possibly a causeway runs over eroding peat from The west shore of Traigh nan Sruban into the inter tidal area.	Field walking 30.3.95
NB 0466 3431	Causeway	This small causeway crosses the stream that runs into Traigh nan Sruban at its north end. Measuring 11.0 metres in length and 2.0 metres in width with a gap of 1.0 metres at its centre to allow water to flow through.	Field walking 31.3.95
NB 0737 3613	Causeway and natural islet.	This causeway runs for 25.0 metres from the east shore of Loch Mor to a completely natural islet with no man made features on it.	Field walking 29.3.95, Diving 4.4.95.
NB 0413 3250	Cell	The entrance to this cell is eroding out of stable dune behind the Uig sands in the area where the Lewis chessmen were discovered. The entrance is 0.8 metres wide and the dry-stone door piers stand to 0.4 metres in height.	Field walking 08.4.95
NB 0515 3720	Cell/mill	Situated immediately to up stream of 35 (still) is a small cell of rough construction and measuring 4.0 x 4.0 metres It is possible, given this structures proximity to the stream running from Loch Mheacliet to the sea, that this structure is a mill.	Field walking 27.3.95
NB 0337 3610	Cell/ Shieling	10.0 metres to the south of 76 (Guinness) is a cellular structure of similar nature as those associated with monument 76, measuring 2.0 metres by 1.5 metres and constructed of edge set slabs. This feature is situated below east facing rock faces.	Field walking 27.3.95
NB 0380 3793	Cell/ shieling?	This survives as a single course of rough stone in a sub-rectilinear arrangement. The cell is imbedded in the turf and measures 3.0	Field walking 28.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		metres west - east and 2.5 metres north - south. This monument is in the immediate vicinity of 17 (Chapel) and may be part of that complex.	
NB 0375 3815	Cells/ shieling?	These two cells are separated by 16.0 metres and are of similar edge set slab construction. The cell to the south is rectilinear and measures 2.2 metres north - south and 1.2 metres west - east. The second cell is circular and is 1.5 metres in diameter. Both of the cells may be part of the chapel complex (monument 17).	Field walking 28.3.95
NB 0349 3641	Chambered Cairn?	This feature is situated on the south facing terraces above Loch Ruadh Guinnerso about 50 metres to the east of eroding west facing sea cliffs. Measuring 3 metres in diameter, the structure has a central chamber constructed of edge set slabs that measures 1.0 metres square with small ambries or galleries on its north, south and east sides. There is a passage on the west side of the chamber that is 0.75 metres wide and 1.5 metres long. On the south-west and north-west side the remains of a cairn may be seen piled against the chamber. This cairn consists largely of small stones covered with grass.	Field walking 27.3.95
NB 0390 3790	Chapel complex	This ruined dry-stone chapel sits on the south shore of a small unnamed loch and measures 7.0 metres west - east by 5.0 metres north - south. It stands up to 1.5 metres high. The interior is filled with rubble which must represent the remainder of the roof and walls. The entrance at the east end of the south wall, has been blocked by the construction of a small round cell within the chapel. This cell measures 0.7 metres in diameter. 3.0 metres to the east of the chapel are a group of sub-circular cells measuring 2 metres by 5 metres. Elsewhere within the immediate vicinity of the chapel are 12 other cells of similar dry-stone construction.	Field walking 28.3.95, RCAHMS. NMRS.NB03 NW 1,2,3 Ordnance Survey. Present edition 1:10000
NB 0536 3751	Cultivation	Situated on a west facing slope, this platform measures 13 metres west - east and 7.0 metres north - south. On its south side a denuded wall or clearance feature may be seen running the width of the platform.	Field walking 24.3.95
NB 0542 3713	Cultivation	This rig is cut into a west facing slope at the foot of Rubha Mor and measuring 6.0	Field walking 24.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		metres north - south and 15 metres west - east. This feature may be accentuated by mass movement caused by water from a stream that runs immediately to the east of the feature.	
NB 0520 3560	Cultivation	Hand dug bedding runs in all directions, around the spur of land between Loch Druim Coladale and Allt Liana Steishal. This bedding is not as regular and enclosed as the bedding of monument 263 (NB 0533 3414) and may be of earlier date.	Field walking 30.3.95
NB 0440 3503	Cultivation	This area of hand dug lazy beds is enclosed by a modern wire fence. Two sets of bedding are to be found within this enclosure, the first on the west of the enclosure run north - south for 45.0 metres and consist of 4 beds. The second area of rigging runs west - east for 50 metres in the east of the enclosed area and consists of 20 beds.	Field walking 29.3.95
NB 0459 3495	Cultivation	These south facing rows of hand dug lazy bedding have a wave length of 2.0-3.0 meters and run irregularly for 100.0 metres between the 20.0 and 40.0 metre contour.	Field walking 28.3.95
NB 0445 3494	Cultivation	Situated on the steep slopes immediately to the west of the Traigh nan Sruban are a series of rigs running both west - east and north - south. These beds run from the road at the foot of the slope to the crest of the ridge.	Field walking 29.3.95
NB 0521 3494	Cultivation	Situated on south west facing slopes are a series of hand dug lazy beds measuring some 35.0 metres in length (east - west) and with a 2.0 - 3.0 metre wave length. A fragmentary boundary wall of turf construction runs along the south side of the beds and for a short distance up the west side.	Field walking 28.3.95
NB 0422 3475	Cultivation	This lazy bedding runs north - south on the west facing slopes above Loch Barabhat.	Field walking 29.3.95
NB 0430 3467	Cultivation	These Lazy beds run from the crest of Cadh Ruadh east towards the road that runs along the shore of Traigh nan Sruban to Crowlista.	Field walking 29.3.95
NB 0523 3457	Cultivation	Immediately to the north of the church in Timsgarry are a series of hand dug lazy beds Orientated north - south and running for	Field walking 30.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		15.0 metres. These beds have a wave length of 2.5 metres and are bounded by a modern fence to the east and a turf dyke to the west.	
NB 0397 3436	Cultivation	This hand dug lazy bedding runs east - west for up to 230.0 metres, have a wave length of 3.0 metres and is bound on its north edge by a stone dyke.	Field walking 30.3.95
NB 0449 3432	Cultivation	Crossing the mud flats at the north end of the Traigh nan Sruban is this turf wall 58.0 metres long that separates an area of lazy bedding from the mud flats.	Field walking 30.3.95
NB 0330 3420	Cultivation	This area of hand dug lazy beds covers approximately 300.0 x 200.0 metres of ground with rigs running in a north - south direction. These rigs are 1.5 metres wide, have a wave length of 3.5 metres and stand to a height of 0.5 - 0.8 metres.	Field walking 28.3.95
NB 0360 3420	Cultivation	This series of hand dug lazy beds has a wave length of 5.0 metres.	Field walking 29.3.95
NB 0460 3420	Cultivation	This area of hand dug lazy beds situated on west facing slopes, runs in a westerly direction from the site of monument 374 (NB 0475 3407) to the shore of the east side of Traigh nan Sruban.	Field walking 28.3.95
NB 0353 3415	Cultivation	This series of short lazy beds lying between two hillocks cover an area of 35.0 metres and run from north - south.	Field walking 29.3.95
NB 0459 3407	Cultivation	Running down the west facing slopes on the east shore of Traigh nan Sruban is this small patch of hand dug lazy beds with a wave length of 3.0 metres.	Field walking 31.3.95
NB 0340 3405	Cultivation	Surrounding a modern sheepwash is an area of hand dug lazy beds that run in a north-west - south-east direction. The sheepwash is built on older structure monument 276 (NB 0340 3405). There is a very faint boundary wall surrounding this area.	Field walking 29.3.95
NB 0382 3403	Cultivation	Cultivation platforms	Field walking 30.3.95
NB 0382 3403	Cultivation	Square cut lazy bedding on Druim Rangarro immediately to the west of Crowlista consisting of beds 3.0 - 4.0 metres wide separated by ditches 1.0 metres wide and 0.1 metres deep.	Field walking 30.3.95

		probably a shelter for watching the sheep	
NB 0359 3383	Cultivation platform	This cultivation platform has a stone revetment along its downhill or southern edge. It is likely that edge of platform was walled as there is tumble beneath the revetment to the south of the site. The platform measures 7.0 x 8.0 metres.	Field walking 31.3.95
NB 0355 3390	Cultivation platforms	This series of square cut lazy beds is situated on south facing slopes above Allt Ranngaro.	Field walking 31.3.95
NB 0770 3530	Dam	This is situated at the north end of western loch of the three lochs with no name. It stands below the summit of Lochan a Bhide Ruaidh and is a turf dyke breached by a stream that runs from the loch to Loch an Fheadain Ghlais. The Dam is 10.0 metres long and has a breach 2.0 metres wide 1.0 metres from its east end.	Field walking 28.3.95
NB 0370 3502	Dam	Build up of stones narrowing the burn between Loch Barabhat and Loch Camasord to facilitate an increase in water volume for the mills between the two lochs. Where the burn forks, the south fork has been dammed to increase flow to north fork which runs to the mills. An engraved stone seems to bear initials "AMO", this may be an early OS benchmark.	Field walking 27.3.95
NB 0318 3490	Dam	This turf and dry-stone dam is situated at the west end of Loch Camasord. As with many of these estate dams it has been breached, and measures in total 21.0 metres including a 2.4 metre gap in its centre.	Field walking 25.3.95
NB 0335 3460	Dam	Situated at across the stream that runs from the north side of Loch Buaile nan Caorach to Loch Camasord are three dams. The most southerly dams stand 4 metres apart and are of dry-stone measuring 0.7 metres in width. 12.0 metres to the north is the third dam constructed of stone and earth and has been breached. Each of these features is 8 meters in length.	Field walking 27.3.95
NB 0469 3552	Dam or causeway	Situated at the north end of the unnamed loch to the south of Loch Steishal is a dam or causeway that crosses the north end of the loch in an west - east direction. Measuring 1.0 metres thick and 5.0 metres long it is constructed of small stones and is mirrored by a second, less substantial feature 2.0 metres to the north.	Field walking 28.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
NB 0260 3418	Dam?	This man made dam appears to block a hollow in the southern slopes of Sheilavig Hill. consisting of a rough rubble wall measuring 2.0 metres in length between two pieces of bedrock. It is possible that this feature is natural.	Field walking 28.3.95
NB 0510 3553	Drainage ditch	This man-made drainage ditch is part of a system of drains that are marked on the modern Ordnance Survey maps. The ditch runs east - west for 300 metres and terminates where it meets Allt Loch Druim Coladale.	Field walking 30.3.95, O.S. Present edition 1:10000 map.
NB 0506 3325	Dun Borranish	This Atlantic roundhouse displays extensive re-use and structural modification. There are eroding faces on the north-west and south-east sides which are removing midden material and pottery. A full description of this site may be found in section 2.	Field walking 07.4.95
NB 0590 3661	Dyke	This stone and turf dyke runs north-east from Loch Laina na Duch, NB 0589 3659 to an Airigh t-Sluic for 300m to NB 0615 3675, following the modern fence line. The name suggests that this feature may be sluice of some description. This feature is marked on the modern O.S. map.	Field walking 25.3.95, O.S. Present edition 1:10000
NB 0538 3660	Dyke	Constructed of turf and stone, this wall runs for 70.0 metres along the south side of a modern boundary fence (marked on the modern O.S. 1:10000 map). Stone faced on the east side the wall is 1.5 metres wide running from NB 0520 3658 east to NB 0590 3661.	Field walking 27.3.95
NB 0511 3659	Dyke	This wall runs along the east side of a small burn that flows in to Loch Mheaclet. Orientated north - south the wall runs for 14.0 metres and stands up to 0.3 metres in height.	Field walking 27.3.95
NB 0522 3645	Dyke	Turf wall or revetment that runs south for 15 metres from the stream that runs into the south east corner of Loch Mheaclet before turning and terminating. This feature appears to be marked on the modern O.S. Map.	Field walking 29.3.95, O.S. Present edition 1:10000
NB 0348 3630	Dyke	The slight remains of a field wall are situated to the east of 76 (Guinness), running for 27.0 metres in a westerly direction before turning north and running for 24.0 metres. It terminates on the shore of	Field walking 27.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		the unnamed loch at NB 0345 3610.	
NB 0325 3615	Dyke	Wall running east from the west facing sea cliffs of the Aird Uig peninsula towards 76 (Guinness) for 100.0 metres. It consists of an alignment of single stones buried in the peat and is occasionally reinforced by collections of smaller stones. The wall has at least one associated cell that measures 1.5 metres in diameter.	Field walking 27.3.95
NB 0755 3577	Dyke	Running north from a bedrock face for 7.0 metres, this stone dyke stands 0.33 metres high and terminates against the south shore of an unnamed water course on the west side of Cnoc nan Glas Allt.	Field walking 30.3.95
NB 0780 3540	Dyke		Field walking 25.3.95
NB 0342 3539	Dyke	This turf dyke is 1.6 metres wide, 0.4 metres high and runs in a northerly direction for 50 metres from NB 0342 3534 along the bottom of a water course until it appears to terminate where it crosses the water course.	Field walking 25.3.95
NB 0495 3531	Dyke	This stone and turf dyke stands up to 1.0 metres high and runs east west for about 15.0 metres before becoming fragmentary. Like many of these old dykes this monument appears to stop and start without relationship to the surrounding landscape.	Field walking 28.3.95
NB 0531 3517	Dyke	Running for 200.0 metres in an east - west direction this field wall closely follows the course of a drainage channel that is situated very slightly to the south.	Field walking 30.3.95
NB 0536 3512	Dyke	This turf dyke runs for 97.0 metres in a north - south direction. It is irregular in form and appears to serve no purpose.	Field walking 30.3.95
NB 0433 3510	Dyke	This dyke runs from the west side of Loch Barabhat for 300.0 to the top of the ridge that overlooks Triagh nan Sruban. The wall is stone construction and is broken in 4 places, apparently deliberately. The wall runs from NB 0408 3489 to NB 0450 3510.	Field walking 29.3.95
NB 0860 3510	Dyke	Stone wall standing 0.5 - 1.0 metres in height on west shore of Loch Sgailen.	Field walking 28.3.95
NB 0570 3500	Dyke	This boulder built dyke runs for 85.0 metres in a north - south direction along the west	Field walking 28.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		shore of the stream called Sidean Tunga.	
NB 0860 3480	Dyke	This grass covered wall runs for 35.0 metres in a west - east direction.	Field walking 28.3.95
NB 0510 3470	Dyke	Running south - north this dyke is constructed of authostatic stones standing up to 0.75 metres in height. At its north this dyke meets a turf wall that runs towards it from the east.	Field walking 26.3.95
NB 0855 3465	Dyke	Remnants of old wall following current fence line.	Field walking 31.3.95
NB 0293 3464	Dyke	The fragment of dry-stone dyking runs for 16.0 metres on a north westerly direction. With no apparent start or end it would appear to be part of a heavily eroded field system that has largely disappeared.	Field walking 28.3.95
NB 0335 3460	Dyke	This bank runs north from Loch Buaile nan Caorach for 230 metres to the southern edge of Loch Camasord. The dyke is constructed of turf and stone and stands no higher than 0.50 metres.	Field walking 27.3.95
NB 0433 3452	Dyke	This dyke runs across a marsh running east - west for 25.0 metres breaking occasionally for bedrock intrusions. This wall is of dry-stone construction.	Field walking 30.3.95
NB 0420 3446	Dyke	Dyke	Field walking 30.3.95
NB 0295 3430	Dyke	The ruins of this old wall stand between 0.05 and 0.20 metres above the ground and runs in a sporadic line for 63.0 metres in a west - east direction. It is likely that this wall is part of a disused field system.	Field walking 28.3.95
NB 0328 3420	Dyke	This length of dry stone wall 3.0 metres long and 0.3 metres thick is buried deep in the peat. This feature disappears into the peat at either end of this short stretch	Field walking 28.3.95
NB 0323 3410	Dyke	Constructed of turf with a stone face on its west side this dyke runs for over 100.0 metres in a north - south direction from NB 0330 3426 - NB 0319 3402 along the west side of an area of cultivation monument 283 (NB 0340 3400). This wall separated monument 283 from a stream that is unnamed but marked on the map.	Field walking 29.3.95, O.S. Present edition 1:10000

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
NB 0366 3409	Dyke	This wall runs intermittently for 110.0 metres in a north-west - south-east direction and is marked on the modern O.S. map.	Field walking 30.3.95 O.S. Present edition 1:10000 map
NB 0293 3406	Dyke	This dry-stone dyke runs in a south-west - north-easterly direction for 20.0 meters being constructed in the furrows between the 5 rigs of that run north - south. This wall (or walls) stand only as high as the rigs it is built between (0.30 metres).	Field walking 28.3.95
NB 0320 3400	Dyke	This denuded wall jutting out from machair grassland on the coastal margin. The walling itself is very rough, using beach stones and inland stones with evidence of coursing. The wall is very fragmentary and reaches about 0.3 metres in height.	Field walking 29.3.95
NB 0358 3390	Dyke	Running from west - east across a slope for 8.0 metres this alignment of stones begins and ends in no particular landscape location and is probably the fragmentary remains of an ancient and now largely buried or destroyed field system.	Field walking 31.3.95
NB 0375 3378	Dyke	Skirting an area of marshy ground this dyke runs 10.0 metres in an east - west direction. This stone and earth dyke begins and ends at no particular point in the landscape.	Field walking 31.3.95
NB 0360 3376	Dyke	This very denuded wall on is situated on the south facing hill slopes overlooking the northern side of Camas Uig. There are two cultivation platforms on the slope above the wall itself which has two surviving courses which stand to 0.2 metres.	Field walking 31.3.95
NB 0360 3376	Dyke	This very denuded wall on is situated on the south facing hill slopes overlooking the northern side of Camas Uig. There are two cultivation platforms on the slope above the wall itself which has two surviving courses which stand to 0.2 metres.	Field walking 31.3.95
NB 0485 3370	Dyke	This wall appears to be associated with monument 300 (NB 0455 3380) running east from that monument for over 10 metres in to the sea loch at Sgeir na Cille. This feature is constructed of stone.	Field walking 30.3.95
NB 0512 3347	Dyke	This stretch of wall (2.0 - 3.0 metres long) runs into the eroding machair plain.	Field walking 07.4.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
NB 0443 3296	Dyke	Possible wall eroding out of isolated dune rampart within the Uig sands; hence is a very unstable site. Does not seem to form any sort of coherent structure.	Field walking 08.4.95
NB 0579 3295	Dyke	Wall line which runs for at least 1 km. Its preservation varies with its proximity to modern settlement.	Field walking 08.4.95
NB 0410 3488	Dyke and cultivation	This dyke runs south - north for 57.0 metres before breaking for 1.5 metres and then resuming again for a further 15.0 metres. Standing less than 0.5 metres high this wall runs along the west side of an area of hand dug rig and furrow or lazy bedding.	Field walking 29.3.95
NB 0410 3488	Dyke and cultivation	This dyke runs south - north for 57.0 metres before breaking for 1.5 metres and then resuming again for a further 15.0 metres. Standing less than 0.5 metres high this wall runs along the west side of an area of hand dug rig and furrow or lazy bedding.	Field walking 29.3.95
NB 0515 3488	Dyke and cultivation	This stone built dyke runs for 100.0 metres in a south-westerly direction along the west side of an area of lazy bedding. The seven beds are Orientated north - south, stand 1.0 metres high, 1.5 metres wide, have a wave length of 3.0 meters and appear to be hand dug. This cultivation is completely enclosed by a second stone dyke that creates a field measuring 50.0 x 80.0 metres.	Field walking 30.3.95
NB 0515 3488	Dyke and cultivation	This stone built dyke runs for 100.0 metres in a south-westerly direction along the west side of an area of lazy bedding. The seven beds are Orientated north - south, stand 1.0 metres high, 1.5 metres wide, have a wave length of 3.0 meters and appear to be hand dug. This cultivation is completely enclosed by a second stone dyke that creates a field measuring 50.0 x 80.0 metres.	Field walking 30.3.95
NB 0533 3414	Dyke and cultivation	These two enclosed fields of hand dug lazy beds are situated on the north side of the road to Crowlista. The western field has 13 beds and the eastern field has 14 beds, all of which stand approximately 0.25 metres high, are 1.25 metres wide and have a wave length of 3.0 metres. The boundary walls are of turf and stone are 0.5 metres high and 1.25 metres wide. These beds are south facing and are Orientated north - south. The fields are ca. 50.0 in length and run for	Field walking 30.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		150.0 metres along the side of the road.	
NB 0533 3414	Dyke and cultivation	These two enclosed fields of hand dug lazy beds are situated on the north side of the road to Crowlista. The western field has 13 beds and the eastern field has 14 beds, all of which stand approximately 0.25 metres high, are 1.25 metres wide and have a wave length of 3.0 metres. The boundary walls are of turf and stone are 0.5 metres high and 1.25 metres wide. These beds are south facing and are Orientated north - south. The fields are ca. 50.0 in length and run for 150.0 metres along the side of the road.	Field walking 30.3.95
NB 0399 3474	Dyke or revetment	This revetment runs for 24.0 metres along the west shore of Loch Barabhat before heading onto a small headland that juts into the loch for 8.0 metres before it and the wall end in a cairn that is marked on the modern Ordnance Survey map.	Field walking 29.3.95 O.S. Present edition 1:10000 map
NB 0515 3532	Dyke, Mill race?	Situated on the north side of the stream called Allt Liana Stieshal is a stone revetment that runs for 24.0 metres and is 4.0 metres at its widest. This revetment faces away from the stream and creates a level piece of ground between its face that stands up to 1.0 metre in height. This structure appears to serve no purpose but may conceivably be part of a water control feature designed to channel water to a mill that can no longer be identified.	Field walking 30.3.95
NB 0473 3660	Dyke/revetment	Running north from NB 0473 3651 for 27 metres to NB 0473 3677 before turning west and running for a further 11.0 is a rough dry-stone wall. This wall/dyke is situated on the west shore of Loch Mheacleit and where it turns there is a large mooring stone on the waters edge.	Field walking 27.3.95
NB 0475 3670	Dykes	This series of short walls has been built around a natural outcrop on the west shore of Loch Mheacleit. The walls range in length from 8.0 metres to 1.0 metres and appear to serve no function and stand no more than 0.75 metres high.	Field walking 27.3.95
NB 0383 3570	Dykes	This loose scatter of stones forms a linear alignment 14.0 metres long. It is possible that these stones are the remains of a turf and stone dyke.	Field walking 25.3.95
NB 0380 3557	Dykes	This series of stone alignments runs along a	Field walking

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		water bed for 25 metres and may be the result of water washing.	25.3.95
NB 0295 3490	Dykes	A system of banks constructed of raised mounds of turf and reinforced intermittently with dry stones has been constructed on the south side of the stream that runs between Loch Camasord and the sea to the west.	Field walking 28.3.95
NB 0461 3455	Dykes	These two dykes are Orientated south-east - north-west and are 50.0 metres in length. The southern dyke is of stone construction and the northern dyke is of turf and stone construction. The two are situated 4.0 metres apart. These dykes seem to separate two areas of cultivation.	Field walking 31.3.95
NB 0345 3437	Dykes	Stone dykes intersect at a valley floor next to Loch Buiale nan Caorach. These walls are heavily denuded and only consist frequently of a single line of stones.	Field walking 30.3.95
NB 0515 3915	Enclosure	This sub-rectilinear enclosure measures 5.5 x 5.0 metres and is of orthostatic and dry-stone construction. Situated 15 metres to the south of monument 1 (NB 0515 3920) there appears to be an earlier structure underneath, though it is difficult to define. It seems likely that this structure is part of a complex including the earlier structure recorded at monument 1.	Field walking 11.4.95
NB 0488 3680	Enclosure	This sub-rectilinear enclosure measures 13.0 metres north - south and 11.0 metres west - east and is constructed of dry-stone up to 5 courses high. The remains of one internal division may be seen in the south west corner of the structure. Running from the centre of the south wall for 27.0 metres to the edge of Loch Mheacleit is a similarly constructed wall.	Field walking 27.3.95
NB 0733 3628	Enclosure	This complex of turf and stone walls forms an enclosure on the east side of Loch Mor that measures 8.0 x 12 metres.	Field walking 29.3.95
NB 0480 3548	Enclosure	This small egg-shaped enclosure, measures 8.0 x 4.0 metres externally and is formed by a low turf bank standing up to 0.3 metres high. On the west, north-west and north-east the bank is barely visible. A very slight irregularly shaped mound is also visible at the centre of the structure standing not more than 0.1 metres. The bank of the enclosure is broken on the south end of the west and	Field walking 28.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		east sides and in the centre of the south side. 15.0 metres to the north are similar banks with some stone scatters but these banks form no obvious enclosure.	
NB 0511 3545	Enclosure	Measuring 12.0 metres north - south and 4.5 metres west - east, this rough oval enclosure is situated on the south west facing slopes to the west of Allt Liana Stieshal. Consisting of an earthen bank measuring 2.0 metres across there is some evidence of stone construction at the south end of the feature. Much of the east side of this site is constructed against a bedrock outcrop.	Field walking 28.3.95
NB 0470 3530	Enclosure	Situated on west facing slopes, the D shaped stone enclosure is attached to the side of a poorly preserved wall and measures 4.5 x 6.0 metres.	Field walking 28.3.95
NB 0381 3493	Enclosure	The remains of this dry-stone wall with turf backing runs from monument 149 (NB 0381 3493) in a westerly direction to monument 135 (Mill). The wall has the effect of creating an enclosure against a crag as it runs into Loch Barabhat at its east end.	Field walking 27.3.95
NB 0381 3493	Enclosure	This oval structure is built into side of a rocky outcrop just by the west shore of Loch Barabhat. There is an apparent entrance facing the loch. The structure is well sheltered and may be a shieling. Measuring 6.0 metres north - south and 3.5 metres west - east, this feature is of dry-stone construction and stands up to 5 courses high in places.	Field walking 27.3.95
NB 0354 3480	Enclosure	This turf built stone lined enclosure measures 6.0 metres north - south, 4.0 metres west - east and is situated immediately on the edge of the beach to the west of Crowlista.	Field walking 31.3.95
NB 0438 3472	Enclosure	The large enclosure measure 11.0 metres square and is constructed of dry-stone. It has entrances on the centre of the west and north wall one internal feature, a small shieling is situated in the south-east corner. A large pile of rubble can be seen in the south-west corner.	Field walking 30.3.95
NB 0385 3446	Enclosure	This semi-circular enclosure is built against a north facing bedrock outcrop and measures 12.0 metres west - east and 11.0 metres north - south. It is constructed of dry-stone	Field walking 30.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		and has a small entrance in its east wall.	
NB 0363 3441	Enclosure	This small sub rectilinear structure measures 2.0 x 2.1 metres and is built of dry-stone directly onto bedrock. A blocked entrance is visible in the south wall.	Field walking 29.3.95
NB 0281 3415	Enclosure	Situated on the edge of Loch Braigh a'Mhill this enclosure measures 9.0 metres in diameters and is built against an north facing outcrop face. The construction is very poor quality as the stones used are mostly beach stones and therefore collapse easily. There are no structures apparent in the enclosure. Running from the west side of the enclosure in a northerly direction for 27.0 metres is a dry-stone wall that links the outcrop to the loch. at the end of this wall a 2.0 metre long causeway links a small island to the loch shore. Monument 265 (NB 0284 3413) lies 10.0 metres to the west.	Field walking 28.3.95
NB 0340 3405	Enclosure	The remains of older structures have been reused in the building of these sheep enclosures. The older structure appears to be 12.0 metres length and is Orientated south-east - north-west. It is likely that this feature is the remains of an old, pre enclosure blackhouse.	Field walking 29.3.95
NB 0387 3397	Enclosure	Situated against a north facing bedrock outcrop this D - shaped enclosure measures 2.5 x 3.0 metres and is constructed of dry-stone with no apparent entrance.	Field walking 31.3.95
NB 0383 3386	Enclosure	Constructed on a cultivation platform situated to the south of a bedrock outcrop this rectangular enclosure measures 5.0 metres north - south and 9.0 metres west - east. Constructed of dry-stone the walls stand up to 1.5 metres high.	Field walking 30.3.95
NB 0383 3386	Enclosure	This rectilinear enclosure constructed of small and medium sized stones measures 5.0 metres square and has a slight bulge in its south-west corner. There is no visible entrance, and in its interior there are trees growing.	Field walking 30.3.95
NB 0356 3380	Enclosure	This rectangular dry-stone building is set into the slope to form a flat floor and is situated only a few metres from the eroding edge of the beach and facing the sea. The back wall, built into the slope, is still upstanding to about 1.4 metres and is	Field walking 31.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		constructed of larger blocks with smaller stones filling in the gaps standing at least 5 layers of coursing high. There is no obvious entrance and the interior is filled with rubble. The sides and front walls are more denuded though do still show coursing. Attached to the seaward side appears to be a smaller annex, a rectangular enclosure which itself seems to show 2 phases of building with a larger more fragmentary structure underneath. There is a large boulder forming the south south-east corner of this annex which has rubble, probably collapse from the major building, within it. There is tumble around the whole structure which measures 7.0 metres north - south and 4.0 metres west - east.	
NB 0503 3328	Enclosure	This unusual oval structure with one main chamber and a pile of stones at its north end which may represent a cell measures 7.0 x 11.0 metres with walls up to 1.0 metres high and 1.5 - 2.0 metres thick. This site overlooks the shore end of the causeway to Dun Borranish.	Field walking 07.4.95
NB 0545 3296	Enclosure	The remains off the oval shaped dry-stone enclosure measure 6.0 metres west - east and 7.0 metres north - south externally. the walls are collapsed and are 2.0 metres thick. The structure is truncated at its north end by a later stone field boundary.	Field walking 08.4.95
NB 0576 3285	Enclosure	This oval structure has an entrance in its north wall and measures 6.0 metres west - east and 8.0 metres north - south. It has walls constructed of turf with an internal facing of stone that are up to 1.5 metres in thickness. This site may be Norse or medieval in date	Field walking 08.4.95
NB 0502 3273	Enclosure	Relatively modern rectilinear sheep enclosure with internal dimensions of 12.0 x 8.0 metres constructed of dry-stone walling standing to 1.25 metres in places.	Field walking 08.4.95
NB 0538 3245	Enclosure	This modern stone walled sheep enclosure measuring 7.0 x 3.5 metres and seems to have been built over an older oval enclosure.	Field walking 08.4.95
NB 0420 3480	Enclosure and cultivation	Orientated north - south this enclosure measures 35.0 metres in length and 25.0 metres in width and is constructed of earth. The bank encloses an area of lazy bedding.	Field walking 27.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
NB 0420 3480	Enclosure and cultivation	Orientated north - south this enclosure measures 35.0 metres in length and 25.0 metres in width and is constructed of earth. The bank encloses an area of lazy bedding.	Field walking 27.3.95
NB 0275 3415	Enclosure and platform	This platform measures 28.0 metres west - east and 12.0 metres north - south and has on its east side a enclosure. The enclosure measures 15.0 metres north - south by 5.0 metres west - east and is constructed of rough dry-stone walling up to 0.5 metres in thickness. Much of the west wall of this enclosure has collapsed. In the south-east corner of this enclosure is an oval cell or shieling measuring 4.0 x 2.0 metres within which no features can be seen.	Field walking 28.3.95
NB 0518 3477	Enclosure and shieling	This enclosure measuring 22.0 x 16.0 metres and constructed of turf and stone walling of a very fragmentary nature. To the north-west on a natural outcrop there is a small turf shieling measuring 2.0 metres in diameter.	Field walking 26.3.95
NB 0436 3501	Enclosure or shieling	Measuring 6.0 metres west - east and 5.0 metres north - south, this D-shaped enclosure is open on its east side and is of dry-stone construction.	Field walking 29.3.95
NB 0860 3470	Enclosure/Black house	This sub rectangular dry-stone construction stands 7 courses high. Measuring 5.0 metres x 4.0 metres externally this building has one entrance in its south wall.	Field walking 31.3.95
NB 0841 3444	Enclosure/shieling	Directly to the south of large boulder with a roughly rectangular. Top surface is a sub rectilinear setting of small stones measuring 2.0 metres square. The area is somewhat sheltered by spurs running towards Loch Sgailler. The stones are overgrown and partially embedded in surrounding peat.	Field walking 31.3.95
NB 0520 3450	Enclosure/shieling and cultivation	This rectangular structure measures 3.0 metres north - south and 4.5 metres west - east. It is situated at the north end of an area of hand dug lazy bedding that runs west - east for 330.0 metres on the west facing slopes of Baile na Cille and cover an area 400.0 metres to the south of the enclosure. The enclosure, rectangular in shape, is built into a stone field wall and is of dry-stone construction, no entrance can be discerned.	Field walking 30.3.95
NB 0339 3483	Fishing Stance and Boat	Situated on the south side of Loch Camasord is a fishing stance measuring 2.5 metres north - south and 2.0 metres in width, an	Field walking 27.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
	Landing	area to the west of this feature has been cleared of stones to allow the beaching of boats.	
NB 0390 3480	Fishing Stance/ Causeway	This dry-stone fishing stance runs from the south side of Loch Barabhat for 5.0 metres before disappearing under the water. This feature is 1.5 metres wide.	Field walking 30.3.95
NB 0284 3413	Grave	This grave measures 2.6 x 0.6 metres and is marked by a rectangle of small beach cobbles. It is said locally that this is the grave of a lawyer from south Harris who killed himself after being spurned by his wife/lover.	Field walking 28.3.95
NB 0340 3607	Guinnesso (Settlement)	Situated on the north facing slopes above the south side of Loch Ruadh Guinnesso is a multi-cellular structure that manifests itself as a mound of stones standing 2.50 metres high and measuring 10.0 metres in diameter. Several cells can be seen, some on the south side and some on the east and north sides. All are of edge set slab construction and measure 3.0 metres in diameter. The cells on the south side appear to be arranged in a shamrock pattern, though it is possible that these three features are actually an entrance to the site with two cells either side of it. The ground between this site and the Loch 200 metres to the north has been cleared and low cultivation ridges may be seen (with a wave length of over 10. metres). Within the large clearance cairns several other possible cells may be seen.	Field walking 25.3.95
NB 0439 3514	Hut/ Shielling	Measuring 4.0 metres in diameter, this structure is circular and of turf and occasional stone construction. An entrance can be seen in the south side of the monument which is situated on the south-west facing slopes at the south end of Druim Mor. It is possible that this structure is Prehistoric in date.	Field walking 29.3.95
NB 0731 3639	Jetty and revetment.	This jetty or fishing stance juts into Loch Mor from its northern tip for 5 metres. Immediately to the west a revetment 5.0 metres long may be seen.	Field walking 29.3.95
NB 0790 3530	Jetty/Fishing Stance	Running into the west side of the eastern loch of the three lochs immediately below the summit of Lochan a Bhìde Ruaidh, this jetty is of dry-stone construction and runs into the loch for 3.0 metres.	Field walking 29.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
NB 0459 3445	Kale/stack yard	Measuring 11.0 x 13.5 metres this enclosure has walls marked by extremely large stones. There is no apparent entrance to this enclosure.	Field walking 04.4.95
NB 0998 3636	Kerbed cairn	Remains of the kerb cairn excavated by Close-Brookes in 1970's. Erosion is occurring at all points (sand deflation) and at present the edge of the eroding scar is 15 m. from west of the kerb.	Field walking 10.4.95; Armit (1994), site 02
NB 0454 3450	Kiln	The remains of this truncated structure measures 6.0 metres x 8.0 metres and is Orientated south-east - north-west. All of the stone in the walls and the chamber of this site have been robbed away.	Field walking 05.4.95
NB 0390 3484	Man made island	Situated in Loch Barabhat on its south side is this large crannog. Measuring 18.0 metres north - south and 14.0 meters west - east, this island is constructed of small rocks this island stands clear of the loch surface by up to a metre. A large dry-stone construction standing in places 10 courses high fills most of the surface of the island. There is no causeway linking this island to the shore 60.0 metres to the south, but a boat noost can be seen on the islands northern shore.	Field walking 03.4.95 O.S. Present edition 1:10000 map RCAHMS, NMRS NO03SW4
NB 1007 3640	Midden	Lenses of this midden identified by Armit (1994) survive though up to 3.0 metres have been eroded and still are being actively eroded by the sea. This is a highly unstable site which is eroding very quickly. It measures 9.0 metres in length and varies in thickness from 0.1 metres to 0.3 metres.	Field walking 11.4.95; Armit (1994), site 22
NB 1006 3626	Midden	Situated on a small bedrock islet at the west end of Traigh na Berie is this eroding shell midden. Consisting of a layer of mixed whole shells 0.3 - 0.5 metres thick, the midden includes bone, charcoal, cramp and some possibly worked quartz. The site sits on a brown sandy soil up to 0.15 metres thick.	Field walking 10.4.95
NB 0372 3504	Mill	The first in a series of mills constructed between Loch Barabhat and Loch Camasord. This site has been heavily demolished and measures 4 metres square with a wheel cell measuring 1.5 metres by 2.0 metres. The water passed through this site from north-east to south-west before running on to a second mill on the shore of Loch Camasord (see the survey described in	Field walking 24.3.95, O.S. Present Edition 1:10000

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		section 2.2) Immediately to the north of this structure is a platform that may be an earlier mill on the same site. To the west is a dam that has been breached to take the water from the site along a leat to the mill at Loch Camasord.	
NB 0358 3496	Mill	This mill stands on the shore of Loch Camasord immediately to the north of 151 (see description in section 2.2 for full relationship). This mill measures 3.5 x 2.3 metres and stands up to 1.5 metres in height.	Field walking 25.3.95, O.S. Present Edition 1:10000
NB 0361 3492	Mill	This stone built horizontal mill measuring 4.0 x 3.0 metres is the second in a series of two (the first being monument 135). This mill is a good example of those typical to the west Uig area not having a corbelled mill Chamber of stone construction upon which the stone would have stood, but having instead an open straight sided chamber that was presumably covered with a wooden floor for the mill stones to sit on. 5.0 metres to the north of this mill is the remains of a sluice on the leat that fed it .	Field walking 25.3.95, O.S. Present Edition 1:10000
NB 0338 3475	Mill	The remains of this mill, built with dry stone, are situated between Loch Buaile nan Caorach and Loch Camasord. Measuring 2.2 metres square the mill chamber is unusual as it bulges on its left side (facing down flow) apparently directing the water flow across the chamber (it is not clear where the horizontal turbine was situated or which way it turned. On the floor of the chamber are the remains of one mill stone.	Field walking 27.3.95
NB 0753 3460	Mill	Orientated south south-west - north north-east this mill is situated on the edge of the cliff that forms the north side of the Glen Bahltos. Measuring 3.0 x 2.0 metres internally the chamber of the mill is open and two mill stone fragments may be seen within it. To the north of the site a sluice and leat runs for 10.0 metres to where water was taken from a natural burn.	Field walking 04.4.95
NB 0555 3302	Mill	Part of an extended mill complex with monuments 324, with associated channels and sluice. The mill measures 5.0 x 5.0 metres and has a hint of an internal scarcement.	Field walking 08.4.95, O.S. Present edition 1:10000 map
NB 0553 3296	Mill	Part of an extended mill complex this site measures 6.0 x 5.5 metres with internal	Field walking 08.4.95, O.S.

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		scarcement still showing and has associated banks and sluice for diversion of water.	Present edition 1:10000 map
NB 0306 3490	Mill and dam	This mill lies 100.0 metres to the west of Loch Camasord and was originally fed by a system of Dykes and Leats that took water from behind the Dam monument 156 (NB 0318 3490). The mill itself is 4.0 metres square with a wheel cell that measures 1.0 metres square. Running from the north wall of the mill for 50 metres is a substantial stone and turf dyke or dam that appears to be to prevent flooding of the mill which is situated on very flat ground.	Field walking 25.3.95
NB 0520 3725	Mill/still	Situated on the east bank of the stream that runs from Loch Mheacliet north to the sea, approximately 500 metres north of the loch, are the remains of a structure. Measuring 6.0 metres west - east and 4 metres north - south, the building is situated under a north facing outcrop and has two identifiable internal areas. While the inflow is not visible, the outflow may be seen exiting the structure on its north-west corner and running for 1.5 metres to the stream. It is possible, given this structures location and size, that it is actually a smithy and/or an illicit still, similar to those recorded at Garenin.	Field walking 27.3.95
NB 0592 3446	Miscellaneous	Drainage ditch	Field walking 04.4.95
NB 0525 3255	Piers/causeways	A series of 4 stone piers (probably for fishing) set into estuary of Uig sands. Each pier is of dry-stone construction is 4.0 - 5.0 metres long and 2.0 metres wide.	Field walking 08.4.95
NB 0380 3386	Platform	These three cultivation platforms are situated on south-east facing hillside overlooking Crowlista. Two have no revetments, only turf faces whereas one is revetted with dry-stone of 2-3 courses.	Field walking 31.3.95
NB 0492 3355	Platform	This platform with a wall slumping at its eroding edge measures 5.0 x 4.0 metres and is situated 10.0 metres to the north of 313 (NB 0492 3355). Some hand made pottery was collected from the eroding face of this site.	Field walking 07.4.95
NB 0779 3572	Platform/revetment	This east facing semi circular stone revetment measures 8.0 metres in diameter.	Field walking 30.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		Built up against a bedrock face, this platform has no apparent function (agricultural??).	
NB 0805 3591	Platforms	These two west facing platforms are cut into the hillside and built up with stone at the front. One measures 8.0 metres across and the other measures 5.0 metres and they are situated 10.0 metres apart.	Field walking 30.3.95
NB 0293 3406	Promontory Enclosure	This promontory protrudes in a southerly direction for 40.0 metres in to the bay at Camas Uig. Its neck is cut by a turf and earth wall standing 0.40 metres high and about 1.5 metres in width. This wall runs for 8.0 metres in a westerly direction and then turns south-west and runs for 17.0 metres to the sea. The interior of the enclosed area is largely bare rock and no structures can be seen within it.	Field walking 28.3.95
NB 0455 3380	Promontory enclosure/fort	The promontory called Tolanaig, centred at NB 0450 3380 is demarked from the mainland to the north by a turf and stone dyke that runs in an easterly direction from NB 0415 3383 for 83.5 metres to NB 0423 3382. This wall has a break of 3.5 metres at its centre point that has been forced to allow the passage of modern farm machinery but otherwise runs uninterrupted from shore to shore of the promontory. No features other than monument 304 (NB 0450 3375) can be seen on the promontory and it is possible that this feature is agricultural.	Field walking 29.3.95
NB 0315 3400	Promontory fort	Set on a promontory that is orientated north - south and is itself separated from the mainland mass by a boulder beach. This natural spur which commands the northern approach to the Camas Uig is cut by a wall that is up to 0.5 metres high which runs the width of the promontory. This wall has two visible faces and is 20.0 metres long with a possible entrance 8.0 metres from its east end. Behind this wall is a second wall that is visible as a face, facing the north. The west side of this monument is revetted to prevent it slipping into the sea. A full description of this site is given in section 2.3.	Field walking 29.3.95
NB 0480 3820	RAF base	This tight group of abandoned buildings of various shapes and sizes sits 50 metres to the south of the RAF broadcasting station at the north end of the Aird Uig peninsula.	Field walking 29.3.95, Ordnance Survey.

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		Constructed between 1954 and 1956 it was abandoned in 1960. It consists largely of single storey flat roofed structures made of re-inforced concrete with iron window frames. These buildings represent the offices and barracks for the late 1950s radio base at the headland. The only unusual buildings on this site are 4 prefabricated huts by the road on the north side of the site. These huts are separated from the camp by a wire fence and may represent an earlier phase of use.	present edition 1:10000 map.
NB 0425 3685	Revetment	Running north west from Loch Mheacleit along the south side of a small stream for 35.0 metres is a revetment constructed of dry-stone construction standing up to 5 courses high (0.5 metres high).	Field walking 27.3.95
NB 0750 3589	Revetment	This small revetment faces north and is situated on the northern slopes of Carnan Theugadail. Running west - east for 2.0 metres, it stands 3 courses high and has no apparent function.	Field walking 30.3.95
NB 0300 3499	Revetment	This stone revetment runs along the north side of the valley that carried the mill run west from Loch Camasord. Measuring 2.0 metres wide, 0.25 - 0.4 metres high, it runs 120.0 metres from NB 0298 3499 to 0312 3500.	Field walking 25.3.95
NB 0305 3464	Revetment	About 5.0 metres below summit of Lingail Mor, on the south-east side there appears to be a wall, or revetment.	Field walking 27.3.95
NB 0538 3691	Scoop and cairns	This feature is a gouge in the peat measuring 16 metres west - east and 8 metres north to south and is up to 1.65 metres deep. Along the south side is a bank or elongated cairn measuring 12.0 x 3.0 metres. On the north west corner of the feature is a cairn measuring 6.0 metres by 5.0 metres.	Field walking 25.3.95
NB 0538 3691	Scoop and cairns	This feature is a gouge in the peat measuring 16 metres west - east and 8 metres north to south and is up to 1.65 metres deep. Along the south side is a bank or elongated cairn measuring 12.0 x 3.0 metres. On the north west corner of the feature is a cairn measuring 6.0 metres by 5.0 metres.	Field walking 25.3.95
NB 0450 3375	Scooped platforms	Situated within the boundaries of the Tolanaish promontory on north facing slopes of the southerly hill of the two that occupy the promontory are 2 possible scooped	Field walking 29.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		platforms measuring no more than 5.0 metres in diameter. One of these platforms shows the slight remains of circular turf structure.	
NB 0496 3375	Scooped platforms	These three scoops are situated in a line running north - south. All three scoops measure 4.0 mete in diameter and none have any structural features upon them.	Field walking 07.4.95
NB 0272 3442	Settlement	Situated in a sheltered valley immediately adjacent to the coast structure in valley just by coast and surrounded by reasonable grazing land; This structure measures 9.0 metres north - south and 5.0 metres west - east. At the north end of this mound is a circular cell or shieling measuring 2.0 -2.5 metres internally, to the south of this several other less distinct features or cells may be seen. While the mound appears to be largely of earth construction the cellular features appear to be dry-stone in nature. It is possible that this feature is a multi cellular shieling, though these are very rare in this area.	Field walking 28.3.95
NB 0492 3355	Settlement	This enclosure measures 30.0 metres west - east and 19.0 metres north - south. Incorporated within the west end of the north wall are a series of scoops or cells that range in size from 2.0 metres to 4.0 metres in diameter and may represent the remains of a poly-cellular building constructed of turf. Immediately to the north of this site several fragments of handmade pottery were found in the eroding dune face.	Field walking 07.4.95
NB 0998 3634	Settlement mound	This settlement mound was identified by Armit (1994) and is becoming increasingly prone to erosion due to increase in rabbit activity. Site stable but potentially sand deflation could set in if rabbit scrapes big enough.	Field walking 11.4.95; Armit (1994), site 20
NB 0988 3616	Settlement mound	This site is as described by Armit (1994) and is stable, though there is some rabbit damage to the mound.	Field walking 10.4.95; Armit (1994), site 18
NB 0712 3610	Settlement?	This sub circular mound of stones measures 9.0 metres in diameter and is situated on the east facing slopes above the village of Cliff on the Bhaltos Peninsula. Within the mound, several cells may be seen; these structures are roughly 3.0 metres in diameter. It is possible that this site is similar in type to	Field walking 30.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		that of (76) Guinnerso.	
NB 0574 3821	Shieling	This rectilinear shieling measures 4.0 metres west - east and 5.0 metres north - south and is of rough, heavily denuded dry-stone construction. This site is situated on the top of the north facing sea cliffs of Rubha Mor.	Field walking 25.3.95
NB 0662 3771	Shieling	Situated immediately to the north of monument 26 (Shieling NB 0652 3755) is a shieling measuring 3.0 metres square. This structure is situated below the east-facing outcrop immediately below the summit of Rubha Mor.	Field walking 25.3.95
NB 0652 3755	Shieling	This sub-circular shieling is situated below the summit of Rubha Mor on its east facing slopes. It measures 3.0 metres in diameter and has a possible north facing entrance. The interior of the south wall is marked by an ambry.	Field walking 25.3.95
NB 0718 3689	Shieling	Situated on east facing slope above the eastern sea cliffs of the Aird Uig peninsula is this rectangular shieling. Orientated south-west - north east the structure measures 3.0 metre by 2.0 metres and has an entrance at the west end of the south wall. Constructed of 0.40 metres dry-stone walling there is an ambry in the east end of the south wall.	Field walking 29.3.95
NB 0464 3619	Shieling	This large stone and turf shieling measures 5.0 metres west - east and 4.0 metres north - south and is roughly circular in shape. Situated on the south shore of Loch Mheacleit, it has been truncated on its east side by the stream that runs from the loch towards the south.	Field walking 28.3.95
NB 0541 3580	Shieling	This dry-stone sub-rectilinear enclosure measures 2.0 metres square and stands between 0.5 - 1.0 metres in height. There is a possible entrance at the south end of the east wall and a small ambry may be seen in the centre of the interior of the north wall. This monument is built against a south facing rockface.	Field walking 27.3.95
NB 0440 3550	Shieling	This sub-circular turf structure measures 6.0 x 5.0 metres externally and has a depression measuring 1.0 x 2.0 internally. There is no visible entrance. The location of this monument is only to the nearest 100 metres.	Field walking 25.3.95
NB 0832 3550	Shieling	Situated on the east facing slopes above	Field walking

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		Loch Sgailler, this dry-stone shieling measures 2.0 metres north - south and 1.75 metres west - east internally. There is an entrance 0.5 metres wide in the centre of the east wall.	28.3.95, O.S. Present edition 1:10000
NB 0464 3539	Shieling	This pair of structures are approximately 10.0 metres apart at the south-west corner of the unnamed Loch immediately to the south of Loch Steishal. They are both sub-circular and measure approximately 5.0 metres in diameter. Being constructed of turf and pebbles these sites have several associated walls of small stone that jut out on to the unnamed loch.	Field walking 28.3.95
NB 0451 3538	Shieling	Situated on the slight east facing slope above the nameless loch to the south of Loch Steishal is this circular shieling of turf construction. It measures 3.0 metres in diameter and there is a possible entrance on the west side of the monument.	Field walking 28.3.95
NB 0462 3538	Shieling	This pair of structures are approximately 10.0 metres apart at the south-west corner of the unnamed Loch immediately to the south of Loch Steishal. They are both sub-circular and measure approximately 5.0 metres in diameter. Being constructed of turf and pebbles these sites have several associated walls of small stone that jut out on to the unnamed loch.	Field walking 28.3.95
NB 0434 3526	Shieling	These two shielings are situated 5 metres apart. The southern monument is sub-circular, 4 metres in diameter, is of turf and stone lined construction and is heavily eroded. The northerly monument is rectangular measuring 5.0 metres west - east and 4.0 metres north - south and is of dry stone construction. This second shieling is also heavily denuded.	Field walking 24.3.95
NB 0434 3525	Shieling	These two shielings are situated 5 metres apart. The southern monument is sub-circular, 4 metres in diameter, is of turf and stone lined construction and is heavily eroded. The northerly monument is rectangular measuring 5.0 metres west - east and 4.0 metres north - south and is of dry stone construction. This second shieling is also heavily denuded.	Field walking 24.3.95
NB 0437 3515	Shieling	This shieling measures 5.0 metres west - east and 4.0 metres north - south. It is	Field walking 29.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		constructed of rough stone and stands up to 1.0 metres in height. There is a possible entrance in the east end of the north wall measuring 1.0 metres across. This site is situated 4.0 metres to the north of 126 (NB 0439 3514).	
NB 0440 3514	Shieling	This structure is rectilinear and measures 3.5 x 3.0 metres externally and 2.0 x 1.5 metres internally. The walls are constructed of rounded stones and no entrance can be seen.	Field walking 29.3.95
NB 0437 3488	Shieling	This circular structure measures 5.0 metres in diameter, has walls 1.0 metres in width and 0.5 metres in height. There is an entrance on the east side of the monument which is largely constructed of stone. 4.0 metres to the south-west is a small stretch of semi-circular wall measuring 3.0 metres in length, 1.0 - 0.5 metres in width and 0.5 metres in height.	Field walking 29.3.95
NB 0364 3480	Shieling	Constructed against a bedrock face this rectangular structure measures 1.5 x 2.5 metres externally and is constructed of dry-stone.	Field walking 30.3.95
NB 0441 3476	Shieling	Situated on the ridge to the west of Traigh nan Sruban this site is rectilinear and measures 2.0 metres x 2.5 metres and is stone in construction though the remains of the wall are covered with turf. The interior of this site is filled with rubble. An entrance can be seen at the south end of the west wall. Immediately to the west of this site is a small circular cairn measuring 1.0 metres in diameter.	Field walking 29.3.95
NB 0365 3475	Shieling	The remains of this oval turf and stone shieling are built against an east facing bedrock face and measure 1.5 x 2.0 metres.	Field walking 30.3.95
NB 0283 3474	Shieling	This small shieling is situated in a valley next to stream and short distance from small loch both of which are nameless. The walls are of turf and have an internal facing standing up to 3 courses, maximum height of 0.4 metres. The structure is sub circular measuring 2.5 metres in diameter, 1.5 metres in internal diameter and has an entrance on its south side.	Field walking 28.3.95
NB 0405 3468	Shieling	This two celled shieling is Orientated north - south, with the main cell measuring 4.0 metres in diameter being situated to the	Field walking 26.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		south. This main cell is of stone construction where the northern cell is smaller and is partially constructed of turf. To the north of the structure is the faint remains of a third circular cell constructed from turf.	
NB 0473 3456	Shieling	This turf shieling stands up to 0.20 metres high and is rectilinear in shape measuring 1.0 x 2.0 metres.	Field walking 27.3.95
NB 0740 3455	Shieling	This rectilinear structure measures 3.0 x 4.5 metres externally and is of dry-stone construction. No entrance can be discerned as the site is heavily collapsed.	Field walking 04.4.95
NB 0338 3448	Shieling	This oval structure measures 3.0 x 2.0 metres externally and 2.0 x 1.0 metres internally, stands 0.3 metres high and is of rough dry-stone construction but is largely collapsed.	Field walking 30.3.95
NB 0388 3447	Shieling	This oval stone built shieling measures 4.0 metres north - south and 3.0 metres west - east and has walls that stand up to 0.5 metres height. There is a possible entrance 0.5 metres wide in the north-east corner of the site.	Field walking 30.3.95
NB 0352 3443	Shieling	Built against two bed rock faces and is of dry-stone construction. Measuring 2.0 metres square this site faces north-east.	Field walking 29.3.95
NB 0640 3440	Shieling	This sub rectilinear structure measures 3.0 metres by 3.0 metres with walls constructed of turf standing up to 0.25 metres in height and 0.75 metres in width. A break in the north wall measuring 1.50 metres is probably an entrance.	Field walking 04.4.95
NB 0433 3437	Shieling	Built into a stone dyke that runs for 100.0 metres north from a south facing rock outcrop. Situated 5.0 metres from the south end of the dyke is a circular structure measuring 2.5 metres in diameter and has an entrance 0.5 metres wide in its west side.	Field walking 30.3.95
NB 0618 3435	Shieling	This small sub rectilinear structure measures 2.0 x 1.5 metres internally and is constructed of dry-stone that survives to a height of 1 course. There is a break in the centre of the south wall that measures 0.60 metres wide. This site is situated 15 metres to the south-east of monument 233	Field walking 04.4.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
NB 0450 3434	Shieling	This small stone built shieling overlooks Traigh nan Sruban from its east shore and measures 2.0 x 2.0 metres and has no apparent entrance. This site is situated within the boundary of monument 243 (NB 0457 3434).	Field walking 31.3.95
NB 0611 3432	Shieling	This rectilinear structure has dry-stone constructed walls standing up to 1.5 metres in height. Measuring 2.0 x 1.5 metres internally no entrance can be seen though the south wall is heavily collapsed.	Field walking 04.4.95
NB 0428 3431	Shieling	This possible shieling located on the shore of Traigh nan Sruban measures 2 x 2 metres. The walls are 0.5 metres thick and re constructed of turf and stone. An entrance 1.0 metres wide can be seen on the north side of the structure.	Field walking 31.3.95
NB 0482 3428	Shieling	The remains of this rectangular turf structure measures 4.0 metres north - south, 2.0 metres west - east and stands to about 0.5 metres in height. There is a possible entrance visible on the north side, though the feature is indistinct in this area.	Field walking 27.3.95
NB 0337 3407	Shieling	This circular shieling consists of a mound 4.5 metres in diameter with a bank 1.0 metres wide forming an enclosure 2.5 metre in diameter in the mounds centre. an entrance 1.0 metres wide can be seen in the centre of the south-east side of the enclosure.	Field walking 28.3.95
NB 0452 3407	Shieling	Situated on the east shore of Traigh nan Sruban is this small rectangular shieling measuring 3.0 metres by 2.0 metres. This structure is of turf construction standing up to 1.0 metres and has a small entrance at the north end of the west wall.	Field walking 31.3.95
NB 0459 3404	Shieling	Measuring 2.0 metres square this stone built shieling is situated on the east shore of Traigh nan Sruban. This structure stands 0.5 metres high and has no apparent entrance though its south and east sides are heavily collapsed.	Field walking 31.3.95
NB 0475 3390	Shieling	This rectangular turf built shieling measures 2.0 x 2.5 metres and exhibits no apparent entrance. It is possible that the structure was originally stone lined.	Field walking 31.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
NB 0456 3383	Shieling	This stone and turf shieling beside Traigh nan Sruban measuring 2.0 metres x 3.0 metres. A second shieling site can be seen 6.0 metres to the south-east.	Field walking 31.3.95
NB 0457 3383	Shieling	This stone and turf shieling beside Traigh nan Sruban measuring 2.0 metres x 3.0 metres. A second shieling site can be seen 6.0 metres to the south-east.	Field walking 31.3.95
NB 0510 3354	Shieling	Small "sheep-watch" overlooking eroding machair plain. Walls are stone lined with turf and measure internally 1.0 x 1.5 metres.	Field walking 07.4.95
NB 0500 3335	Shieling	This oval turf shieling measures 1.5 x 2.5 metres externally and 1.0 metres diameter internally and is situated at the summit of Borranish a Muigh.	Field walking 07.4.95
NB 0579 3296	Shieling	This rectilinear stone shieling measures 4.0 x 3.5 metres and is constructed against a south facing bed rock face..	Field walking 08.4.95
NB 0579 3295	Shieling	This multi-cellular shieling is Orientated north south and measures 8.0 x 3.5 metres overall. Built against an east facing outcrop the site consists of 2 cells, the northerly one measuring 2.0 metres in diameter internally and the southern on measuring 2.5 metres in diameter internally. There is a possible entrance in to the southern cell at the south-west corner of the site.	Field walking 08.4.95
NB 0502 3246	Shieling	This turf shieling measures 2.0 x 3.0 metres.	Field walking 08.4.95
NB 3403 456	Shieling /cairn	This structure survives as a series of stones embedded in the ground surface in an ovoid pattern measuring 3.0 metres north - south, 2.0 metres west - east and may be the remains of a cairn or sub circular stone and turf shieling.	Field walking 29.3.95
NB 0458 3403	Shieling/Blackhouse	This stone and turf built rectangular structure measures 4.0 x 3.0 metres and stands 1.5 metres high. This structure is apparently to small to be a blackhouse and to large to be a shieling.	Field walking 31.3.95
NB 0422 3475	Shieling/Bothy	Measuring 2.0 x 2.5 metres externally and 1.25 metres square internally this small structure is built into an dry-stone dyke that runs north - south. There is no apparent entrance in to this structure.	Field walking 29.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
NB 0494 3365	Shieling/Bothy	Built into a field wall this structure measures 1.5 metres square externally and 1.0 metres square internally and is of dry-stone construction with a possible entrance on the north side.	Field walking 31.3.95
NB 0510 3353	Shieling/cairn	This denuded cairn or shieling measures 4.0 x 2.0 metres and is oval in shape.	Field walking 07.4.95
NB 0456 3415	Shieling/cell	This oval structure is constructed of turf stone and wood and measures 2.5 metres north - south and 2.0 metres west - east. There is a possible entrance less than 1.0 metres wide situated on the south-east side of the site from which a semi circular alignment of stone runs for 1.3 metres in a southerly direction.	Field walking 29.3.95
NB 0481 3368	Shieling/cell	This stone built structure is constructed on bedrock and is sub-oval in shape, measuring 3.5 x 3.0 metres. Orientated west - east the site has no apparent entrance, and is flatter on its south side and bulbous on its north side.	Field walking 29.3.95
NB 0475 3407	Shieling/Hut	The fragmentary remains of this circular turf structure stand no higher than 0.25 metres and measure 3.0 metres diameter internally and 5.0 metres diameter externally. there is an indication of a possible entrance way on the north-west side of this structure.	Field walking 29.3.95
NB 0490 3440	Shieling/kiln	Built into a turf and stone dyke is a circular structure 2.0 metres in diameter constructed of stone with an turf or earth core. This structure has an entrance 0.5 metres wide on its north-east side and may be a shieling or possibly a corn drying kiln.	Field walking 26.3.95
NB 0480 3530	Shieling/Kiln?	This stone and turf shieling measures 3.0 metres east - west, 2.5 metres north - south and is roughly oval in shape. A possible entrance may be seen in the north wall. It is possible that this structure had some other function such as a kiln or day shelter as it appears to be part of the surrounding pre-crofting landscape.	Field walking 28.3.95
NB 0627 3435	Shieling/Shelter	This sub-rectangular arrangement of stones stands 1 course high measures 1.8 x 0.5 metres and is Orientated east - west. This site may be a day shelter or shieling.	Field walking 04.4.95
NB 0567 3255	Shieling/shelter	This dry stone structure is U shaped and measures 2.5 x 3.5 metres and is open to the	Field walking

		south.	08.4.95
NB 0470 3470	Shieling?	Measuring 3.0 metres in diameter externally this circular stone shieling is situated on top of a low rocky knoll.	Field walking 27.3.95
NB 0432 3437	Shieling?	This D shaped enclosure is built against a south facing outcrop 7.0 metres to the east of monument SS (NB 0433 3437). This feature is 2.0 metres in diameter, has no apparent entrances and is constructed of dry-stone and earth.	Field walking 30.3.95
NB 0284 3413	Shielings	The remains of these two shielings are situated 7.0 metres apart on edge of south west facing sea cliffs on the north side of the Camas Uig . Both have two cells arranged in a figure of 8 pattern. The remains now are heavily denuded, but the basic outline can still be seen in the turf. The westerly structure is Orientated west to east and measures 3.5 metres in length and 1.5 metres in width. The eastern structure is Orientated north - south and measures 8.5 metres in length and 4.0 metres in width.	Field walking 28.3.95
NB 0286 3413	Shielings	The remains of these two shielings are situated 7.0 metres apart on edge of south west facing sea cliffs on the north side of the Camas Uig . Both have two cells arranged in a figure of 8 pattern. The remains now are heavily denuded, but the basic outline can still be seen in the turf. The westerly structure is Orientated west to east and measures 3.5 metres in length and 1.5 metres in width. The eastern structure is Orientated north - south and measures 8.5 metres in length and 4.0 metres in width.	Field walking 28.3.95
NB 0505 3355	Shielings	These three shielings are of turf construction in 2 cases and stone lined turf construction in the third case and are all built against outcrop faces on the summit of Borranish a Stigh. All three sites measure about 2.0 x 1.5 - 2.0 metres externally and have walls up to 0.6 metres thick.	Field walking 07.4.95
NB 0506 3355	Shielings	These three shielings are of turf construction in 2 cases and stone lined turf construction in the third case and are all built against outcrop faces on the summit of Borranish a Stigh. All three sites measure about 2.0 x 1.5 - 2.0 metres externally and have walls up to 0.6 metres thick.	Field walking 07.4.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
NB 0504 3354	Shielings	These three shielings are of turf construction in 2 cases and stone lined turf construction in the third case and are all built against outcrop faces on the summit of Borranish a Stigh. All three sites measure about 2.0 x 1.5 - 2.0 metres externally and have walls up to 0.6 metres thick.	Field walking 07.4.95
NB 0458 3834	Shieling/mill?	Measuring 1.5 x 2.0 metres, this rectilinear dry-stone construction is situated immediately to the north of a small stream that runs to the east cliff ca. 25.0 metres to the west. This structure sits on the line of a dry stone wall that runs along the north side of the stream for 20.0 metres to the west and 26.0 metres to the east before crossing the wall and continuing east for a further 23.0 metres. It is possible that this wall is the dyke for a water control system for a mill and the structure is the mill that it feeds.	Field walking 29.3.95
NB 0485 3540	Standing stone/marker	This edge set marker stone is 0.5 metres high and measures 0.3 x 0.15 metres and is sported by 4 smaller stones set wholly in the ground. The stone is roughly triangular in shape and is set along the intermittent boulder alignment 90 (NB 0483 3560)	Field walking 28.3.95
NB 0642 3678	Stepping stones	These stones run north - south for 10.0 metres through marshy ground and across a small stream on the south side of Loch Deireadh Banaig.	Field walking 25.3.95
NB 0483 3623	Stepping stones	This set of stepping stones crosses the stream that runs from the south end of loch Mheacleit, approximately 6.0 metres to the south of the loch.	Field walking 29.3.95
NB 0761 3550	Stepping stones	Crossing the mouth of the stream that runs from the north in to the unnamed loch to the west of the summit of Druim an Rithaic, is a line of stepping stones 5.0 metres long.	Field walking 30.3.95
NB 0355 3626	Stone alignment	A line of stones embedded in the Loch shore runs north-east - south-west below raised terrace on the south-west side of Loch Ruadh Guinnerso for 5.0 metres. This feature appears to mark one side of a slight hollow that may have been a fish trap, possibly related to 76 (Guinnerso).	5Field walking 25.3.95
NB 0483 3560	Stone alignment	This intermittent line of large boulders (many over 0.5 metres in height) runs for over 300.0 metres and has 1.0 - 2.0 metres	Field walking 28.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		gaps where best preserved.	
NB 0510 3553	Stone platform	This concentration of stones forms a platform measuring 4.0 x 4.0 metres that sits on the west facing slopes above Allt Liana Stieshal.	Field walking 28.3.95
NB 0318 3429	Stone Setting	This irregular circular arrangement of stones of varying shapes and sizes does not appear to make full circle over the large knoll on which it is situated and measures 29.0 x 25.0 metres.	Field walking 28.3.95
NB 0489 3397	Stone spread	The remains of this site survive as a spread of stones that may mark the location of a denuded cairn though it is possible that the scatter is a natural effect of erosion.	Field walking 29.3.95
NB 0378 3585	Stone structure	This rectilinear stone structure, measuring 2.5 metres south-west - north-east and 1.5 metres south-east - north-west, is waterlogged and may have been excavated.	Field walking 25.3.95
NB 0389 3515	Stone structure	This structure appears as two pieces of oval walling 4m & 2m in length and 1.5m apart. It is situated on a craggy outcrop of Cnoc Mairstean 100m from Loch Barabhat with extensive views from north to south-west. .	Field walking 27.3.95
NB 0463 3841	Stone wall	Orientated west - east this low stone wall runs from the west edge of the parcel (sea cliffs) and matches the orientation of the northern fence in the parcel for 108 metres. Consisting of loose stone and boulders the wall is 0.5 metres wide and is marked on the modern OS 1:10000 map.	Field walking 29.3.95
NB 0415 3810	Stone wall	This stone wall stands up to 0.7 metres high and runs for 170.0 metres in a northerly direction from the northern corner of Loch Bheannaich at NS 0414 7398 to the north facing sea cliffs at NS 0418 3814, cutting off a promontory. This wall is not as well constructed as monument 22 but, in concert with Loch Bheannaich, it truncates the headland to the west. Within this demarcated area stands the Chapel monument 17.	Field walking 28.3.95, Ordnance Survey. Present edition 1:10000
NB 0382 3774	Stone wall	This substantial wall runs from the cliff edge at NS 0384 3772 in a north-easterly direction for 80.0 metres before it terminates on the shore of Loch Bheannaich at NS 0390 3777. The wall is of double faced dry-stone construction with a small stone core, is well	Field walking 28.3.95, Ordnance Survey. Present edition

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		constructed to a thickness of 1.0 metre and stands to a height of 1.5 metres. Approximately 6 metres from the east end is a deliberately constructed break or gate measuring 1.0 metre in width.	1:10000
NB 0695 3729	Stone wall	This old field boundary mimics the line of a modern fence some 15 metres to the north, running in irregular line for 70.0 metres south-west from the sea cliff.	Field walking 29.3.95
NB 0515 3715	Stone wall	This stretch of stone dyking stands up to 0.6 metres wide and one course high. It runs for only 18.0 metres starting and stopping with no apparent purpose. This wall is a vestige off a field boundary of some antiquity and is deeply embedded in the peat.	Field walking 27.3.95
NB 0484 3620	Stone wall	This stretch of stone walling runs for 8.0 metres along the west bank of the stream that runs between Loch Mheacleit and Loch Steashal. The wall is of dry-stone construction and appears to be associated with a causeway across the stream.	Field walking 28.3.95
NB 0451 3538	Stone wall	This stone and turf wall runs north - south for 41.0 metres along the west shore of the unnamed loch to the south of Loch Steishal.	Field walking 28.3.95
NB 0546 3486	Stone wall	This stone dyke runs for 150.0 metres in a northerly direction from the Crowlista road to the Aird Uig road. It is of dry-stone construction standing 1.0 metres wide and 1.0 metres high and appears to be an abandoned field boundary.	Field walking 30.3.95
NB 0324 3491	Stone wall/jetty	The remains of this low dry stone wall stand about 0.4 metres above surface of Loch Camasord. It appears likely that this monument was constructed to provide a 'bridge' to get out to the piece of bedrock standing above the loch level 3.0 metres from the shore, possibly for fishing in the loch.	Field walking 27.3.95
NB 0383 3581	Stone walls/cairn	This star shaped arrangement of walls is 3.5 metres in diameter and is heavily eroded. This may be a large eroded cairn but the presence of timber macrofossils may indicate that the site is a burnt mound.	Field walking 25.3.95
NB 0383 3581	Stone walls/cairn	This star shaped arrangement of walls is 3.5 metres in diameter and is heavily eroded. This may be a large eroded cairn but the presence of timber macrofossils may	Field walking 25.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
indicate that the site is a burnt mound.			
NB 0403 3474	Structure	This partially submerged stone enclosure juts into Loch Barabhat from its west shore. It is rectilinear in shape and measures 8.0 metres west - east and 4.0 metres north - south, the walls stand to a height of 0.25 metres and are of stone construction.	Field walking 29.3.95
NB 0365 3546	Structure and cairn	This sub-rectangular structure measures 3.0 x 4.0 metres and has a small walkers' cairn set within it.	Field walking 25.3.95
NB 0595 3819	Structure/cairn.	Group of stones on bedrock measuring 2.5 x 3 metres, situated immediately above the north facing sea cliffs of Rubha Mor. This feature may be a cairn, a day shelter or a glacial feature.	Field walking 25.3.95
NB 0718 3689	Structure/Day shelter	Situated below an east facing rock face on the northern slopes of Gleann Gruide Batail is a small semi-circular structure measuring 11.0 metres in radius.	Field walking 29.3.95
NB 0457 3434	Structure/shieling	This stone structure measures 3.0 x 2.25 metres and has no apparent entrance.	Field walking 31.3.95
NB 0370 3502	Sub-peat feature	Stone Alignments? Jutting into Loch Barabhat by up to 4.0 metres is a stone embankment that may be a fishing stance or jetty. Running along the loch side from this jetty for 60 metres is a bank of stone and turf.	Field walking 27.3.95
NB 0403 3491	Utilised Natural Island	Situated in Loch Barabhat on its east side this utilised natural islet measures 15.0 metres north - south and 12.0 metres west - east. To the south of this island are two smaller unused islands. This island has a small apparently modern H-shaped shooting butt built upon it. this island is connected to the east shore of the loch by an dry-stone causeway 34.0 metres long.	Field walking 03.4.95 O.S. Present edition 1:10000 map RCAHMS, NMRS NO03SW3
NB 0454 3458	Utilised natural island/Crannog	This natural island is sited on the mud flats at the north end of the Traigh nan Sruban about 10.0 metres from its east shore. The island is built up with small stones and has a small rectilinear structure measuring 5.5 x 3.0 metres on its summit. A causeway can be seen eroding in the stream on the mud flats running from the east side of the structure to the shore. A full description of the erosion can be found in sections 2.7 and 3.4.3.	Field walking 30.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
NB 0363 3434	Utilised Natural island/ Crannog	Situated on the north shore of Loch Cleider is this utilised natural island. This loch has suffered heavy silting and the island that was once connected to the shore of this loch by a causeway is now situated on the loch edge. The causeway can be seen running in a northerly direction from the island for 19.0 metres. This island itself is a bedrock knoll measuring 20.0x 12.0 metres upon which an arc of stones creates a level platform. at the heart of this platform it is possible to make out the rough outline off a small shieling like structure. The platform measures 9.0 metres by 8.0 metres.	Field walking 29.3.95 O.S. Present edition 1:10000 map
NB 0505 3740	Wall	This wall runs west from NS 0492 3740 for 52.0 metres and has been heavily robbed out and stands only one or two courses high. Turning to the south, the wall runs under a more recent wall line for a further 80.0 metres.	Field walking 27.3.95
NB 0349 3642	Wall	Running south-east from monument 57 (Chambered Cairn) is a fragmentary wall that is confused by the boulder concentrations found on the terraces above Loch Ruadh Guinnerso. This wall is 93.0 metres long and consists of small stone and edge set boulders.	Field walking 27.3.95
NB 0342 3534	Wall	This earthen bank is 1.6 metres across and 0.4 metres tall. It is followed by a burn as it snakes northwards for 40.0 metres where it becomes dry-stone in construction some 0.8 metres in height. Running sporadically for a further 180 metres the wall ends at NB 0328 3545 and is illustrated on the modern O.S. map.	Field walking 25.3.95, O.S. Present edition 1:10000
NB 0510 3528	Wall	These parallel fragments of rough dry-stone walling stand 0.5 metres high, 1.5 metres apart and run from NB 0510 3525 in a south south-westerly direction for 300.0 metres to the modern road.	Field walking 28.3.95
NB 0381 3493	Wall	This well-built wall, stands up to 0.4 metres high and runs east - west between two bedrock outcrops (one in loch Barabhat and one on the shore).	Field walking 27.3.95
NB 0661 3485	Wall	Running west - east for 80.0 metres this wall consists of an alignment of large edge set boulders that stand up to 0.50 metres high and are up to 1.5 metres wide. this wall is probably the remains of an early boundary	Field walking 27.3.95

<i>NGR</i>	<i>Classification</i>	<i>Description</i>	<i>Reference</i>
		wall similar to the modern boundary situated just to the north	
NB 0740 3455	Wall and cairn	This 7.0 metre long stretch of dry-stone wall line stands 2 metres high and lies immediately to the east of a small stream descending into the Glen Bhaltos. 20.0 metres to the north is a small cairn measuring 1.0 x 1.0 metres. this cairn is unremarkable.	Field walking 04.4.95
NB 0740 3455	Wall and cairn	This 7.0 metre long stretch of dry-stone wall line stands 2 metres high and lies immediately to the east of a small stream descending into the Glen Bhaltos. 20.0 metres to the north is a small cairn measuring 1.0 x 1.0 metres. this cairn is unremarkable.	Field walking 04.4.95
NB 0325 3455	Wall or Causeway	This wall runs into Loch Buiale nan Caorach for 8.0 metres in a northerly direction and is constructed of dry-stone.	Field walking 30.3.95
NB 0457 3434	Walled island	This island or promontory situated on the inter tidal mud flats of Traigh nan Sruban measures 42.0 metres x 49.0 metres with traces of walling around the 80 % of its shore. Some small fragments of hand made pot of uncertain date were found in erosion scars within the walls of the site. A full description of this site can be found in section 2.	Field walking 31.3.95
NB 0564 3744	Walling	This complex of walling is situated on the east side of a small stream. It consists of two stretches of turf covered walling of indeterminate nature. The feature is abutted up to or truncated by the stream. The northern wall is 1.25 metres thick and runs for 6 .0 metres before turning south for 5 metres. At the turn there is a small cairn built in the wall line. The southern wall is 3.0 metres long and 1.5 metres thick. Between the two walls is a large amount of tumble that may have come from the north wall.	Field walking 24.3.95
NB 0444 3500	Walling/Shieling?	Running east - west for 5 metres this L-shaped wall turns 90 degrees to the south and runs for a further 4.5 metres. This dry-stone walling is 1.0 metres high and 1.0 metres wide. It is possible that this walling is two sides of a shieling or enclosure.	Field walking 29.3.95

Table 23: Index of Archaeological Visibility

<i>Level of Visibility</i>	<i>Description</i>	<i>Criteria</i>	<i>Examples</i>
Level 0	Invisible	Features that are only revealed when the ground is disturbed by erosion or agriculture. Distributions of such features tend to be concentrated in Machair areas	Most stray finds, unmarked burials sub-peat features
Level 1	Hidden	Features that generally only show when the ground is disturbed (erosion etc) but may on occasion be slightly visible where there has been no disturbance. Also very small unobtrusive structures	Wheelhouses, Souterrains, Burial cairns, wells, EPH settlement, middens
Level 2	Inconspicuous	Small structures and sites that may be missed unless one is in their immediate proximity. Sites that may disappear in long grass or low valleys	Turf dykes and enclosures, cells, carvings extractive industry.
Level 3	Indistinct	Small structures, not easily missed close to but not visible over great distances due to there construction materials or form blending with the surrounding terrain	Cairns, stone dykes and enclosures, feannagan, blackhouses
Level 4	Locally Prominent	Larger structures and features that are clearly visible in the local landscape	Large industrial features, bridges, churches, some stone circles, inland island complex Atlantic round houses
Level 5	Prominent	Monumental features visible over many kilometres, impossible to miss.	Monumental architecture, coastal complex Atlantic round houses, larger stone circles, lighthouses

APPENDIX 11: TABLES RELATING TO THE BERNERA SURVEY (BBP)

Table 49: Gazetteer of sites recorded on Great and Little Bernera

NGR, NMRS	Locale	Class	Structure elements	Artefact Elements	Description	Period
NB13SE 04, NB 1820 3396	Dun Tiddaborra	Atlantic round house	complex Atlantic round house			Ironage
NB 1829 3399	Tiddaborra	Atlantic round house	Site of Dun			Late pre- historic
NB 1680 3430	Port na Duim, Barraglom	Atlantic round house	Dun Barraglom			Late- prehistoric
NB13SE 05, NB 1677 3435	Dun Barraglom	Atlantic round house	complex Atlantic round house			Ironage
NB 1560 3558	Loch Baravat	Atlantic round house	complex Atlantic round house		Dun Baravat	Iron Age
NB14SE 02	Dun Stuigh	Atlantic round house	complex Atlantic round house		Located at the north end of an peninsula or island are the remains of this sub-circular complex atlanttic round house. Measuring 15 metres in diametre and standing up to 2 metres high. In the area of the entrance on the the east side of the site marine erosion has caused extensive damage revealing the foundations of the structure. A later cairn has been built on top of the walls at the west of the site. This site appears to be located to take advantage of the natural protection afforded by the lon island it is situated on. This sisaldn is over 500 metres long and at its widest measures 100 metres. Toady this island is cnected to Bernera by a shingle bank and a causeway both situated at its southern end.	Ironage

<i>NGR, NMRS</i>	<i>Locale</i>	<i>Class</i>	<i>Structure elements</i>	<i>Artefact Elements</i>	<i>Description</i>	<i>Period</i>
NB 1820 3455	Cnoc Sgealaval	blackhouse	Double Blackhouse			Pre-enclosure
NB 1884 3456	Kirkibost	blackhouse	Blackhouse		Measuring 23 x 7 metres this large blackhouse is orinientated from north to south. Surviving mostly as turf banks with the stone faces being only sporadically visible this feature has a barn constructed near the centre of the west wall that measures 13 x 4.5 metres.	Post-medieval/p re-crofting/crofting
NB 1900 3459	Leathad Mor, Kirkibost	blackhouse	Blackhouse			Pre-enclosure
NB 1900 3459	Leathad Mor, Kirkibost	blackhouse	Poly cellular Blackhouse with Kiln			Pre-enclosure
NB 1465 3460	Breivig, Hacklete	blackhouse	Blackhouse and attacked yard			Crofting
NB 1489 3462	Cnoc a' Ghearraidh Dhurbh, Hacklete	blackhouse	Double Blackhouse with attached garden			Pre-crofting
NB 1689 3462	Kirkibost	blackhouse	Blackhouse/croft house		Measuring 19 x 7 metres this blackhouse is orinietated from north to south and has opposing entrances near the north ends of its west and east walls. A small later croft house has been constructed against the structures south wall. This croft house measures 4 x6 metres and has gables at its north and south ends and a single entrance located at the east end of its north wall (allowing entrance from the disused blackhouse) and a window in the centre of its east wall.	Crofting/modern
NB 1528 3464	Hacklete	blackhouse	Blackhouse		This heavily modified structure is orientated from south-east to north-west and measures 14 x 5 metres, It is truncated at its south-east end by a modern corft house. An ancillary structure is constructed at the centre of the north-east wall. This building runs in a north-easterly direction for 16 metres and is 5 metres wide. This ancillary structure has a single entrance at the south-west end of its south-east wall.	Pre-crofting/crofting

<i>NGR, NMRS</i>	<i>Locale</i>	<i>Class</i>	<i>Structure elements</i>	<i>Artefact Elements</i>	<i>Description</i>	<i>Period</i>
NB 1512 3465	Hacklete	blackhouse	Blackhouse		This heavily robbed blackhouse is orientated from north-west to south-east and measures 16 x 5 metres, standing to 0.3 metres. A barn is constructed against the south-east end of the south west wall that measures 5 x 4 metres. This structure has a single entrance located towards the south-east end of the northeast wall. A second door is located opposite this in the south-west wall and provides access to the barn.	Pre-crofting/crofting
NB 1882 3467	Kirkibost	blackhouse	Blackhouse/croft house		Orientated from west to north the remains of this blackhouse measure 17 x 7 metres. This structure has largely been reused in the construction of a more recent croft house at its south end. This more recent dwelling measures 12 x 7 metres and is a one and a half storey building with two dormers on its east side.	Crofting/modern
NB 1540 3468	Hacklete	blackhouse	Blackhouse/Grey house		This much modified blackhouse is orientated from north north-west to south south-east and measures 18 x 7 metres overall. The southern end of this site has been modified to form a grey house with an internal partition and at least one window. This dwelling has suffered heavy collapse but measures circa 13 x 7 metres. The northern end of the black house has been converted into an ancillary structure that measures 4 x 4 metres and has a single entrance located at the south end of the east wall.	Pre-crofting/crofting
NB 1538 3470	Hacklete	blackhouse	Blackhouse/Grey house		This modified blackhouse measures 25 x 7 metres is orientated from west to east. There are the fragmentary remains of a barn constructed at the centre of the structures north wall that measure 20 x 5 metres. Later modifications including a new chimneed gable at the houses west end and a new chimneed partition 8 metres from the west end of the house indicated later conversion of the structure. Large areas of tumble preclude detailed examination of much	Pre-crofting/crofting

NB 1706 3683	Breacleite	shieling	Sheiling			Post Medieval
NB 1472 3699	Valasay	shieling	Day shelter		Constructed of drystone this small shelter wall runs south from a south facing bedrock cliff for 2 metres. The wall is 0.2 metre thick and stands to a height of 0.3 metres.	Unknown
NB 1756 3729	Cnoc Choirgarod	shieling	Sheiling		Orinetated north to south this site measures 4 x 2 metres and has a single entrance at the north end of its east wall. The site is constructed in drystone and has 5 ambreys built into its interior, 3 on the west wall on at the south end of its east wall and one in the centre of its north wall.	Pre-crofting/crofting
NB 1727 3743	Cnoc Choirgarod	shieling	Sheiling		Constructed in drystone this sheiling is rectilinear, orientated west to east and measures 3 x 1.5 metres. It has opposing entrances and the west ends of its north and south walls and two ambreys may be seen on the interior face of its east wall. Immeiatly to the west of this site lies the cultivation site NB 1727 3743b.	Pre-crofting/crofting
NB 1426 3773	Tob Valasay	shieling	Day shelter		Constructed against an east facng bedrock cliff face, this drystone shelter measures 2.9 x 1.2 metres and is open to the south.	Unknown
NB 1612 3777	Breacleite	shieling	Sheiling			Post Medieval
NB 1484 3789	Tob Valasay	shieling	Day Shelter		This horse shoe shaped shelter is constructed of drystone with a radius of 1.5 metres against a bedrock face faces south-west.	Unknown
NB 1452 3830	Druim nam Buailtean, Tobson	shieling	Sheiling			Pre-enclosure
NB 1463 3833	Druim nam Buailtean, Tobson	shieling	Sheiling			Pre-enclosure
NB 1334 3889	Geodha na Calman	shieling	Sheiling		Mesuring 4 x 4 metres this fragment of curving drystone walling probably represents the	Unknown

					remains of a shepards day shelter.	
NB 1346 3903	Geodha na Calman	shieling	Sheiling		Consisting of a drystone semi-circular wall that faces north this feature probably represents the remains of a shepards day shelter.	Unknown
NB 1415 3920	Middle Shalaval	shieling	Sheiling		Located in lazybedding immediatley to the east of NB 1415 3920a is this small rectangular sheiling that measures 3 x 2 metres, orientated north to south and has an entrance in the centre of its north wall.	Pre-crofting/crofting
NB 1561 4006	Rubha Thorab	shieling	Sheiling			Unknown
NB 1478 4021	Kyles of Little Bernera	shieling	Sheiling		Located within the fieldsystem, site NB 1478 4012, is the remains of a circular stone built sheiling measuring 3 metres in diametre. The north edge of the site has been completely destroyed.	Unknown
NB 1424 4024	Bostadh	shieling	Sheiling		Constructed of stone and turf this reclinear structure measures 4 x 6 metres and is orientated north to south. A single entrance is located in the west end of the north wall and within the strucutre the floor is largely obscured by rubble. This strucutre is a sheiling that post-dates the abandonment of the village of Bostadh in the early 19th century	Pre-crofting/crofting
NB 1477 4025	Kyles of Little Bernera	shieling	Sheiling		This stone built strucutre is located at the west end of the Kyles of little Bernera on their south shore. It is truated by the eroding cliff face at its north end and measures 2.5 x 2.5 metres.	Unknown
NB 1408 4029	Bostadh	shieling	Sheiling		Measuring 4 x 2.5 metres this structure is orientated north to south and is constructed of stone faced earth cored walls. A single entrance is located at the northern end of the east wall and still ahs its lintle in situ. It is likely that this structure is a sheiling that post-dates the abandonment of the village of Bostadh in the early 19th century	Pre-crofting/crofting

NB 1628 3644	Loch Breaclete	utilised natural island	Causewayed natural island		This small island is located 10 metres to the north of the promontory that protrudes into the south end of Loch Breaclete. The island is linked to the shore by a partially submerged causy of stone that is 10 metres loing and up to 2 metre wide. At the islands end the causeway is flanked by two groyns that manafest themselves as low mounds of stone runing to the west and east for 3 to 5 metres. There are indistinct features indicating a possbile stone structure on the island, but any feature on the shore shide has been obliterated by intensivfe agriculture.	Prehistoric
NB 1512 3661	Tob Valasay	utilised natural island	Utilised natural island		A small natural island is linked to the east shore of the east arm of the tidal inlet, Tob Valasay, by a stone casue way. 8 Metres of this feature is visible at the shore side and a similar distance is submerged	Unknown

<i>NGR, NMRS</i>	<i>Locale</i>	<i>Class</i>	<i>Structure elements</i>	<i>Artefact Elements</i>	<i>Description</i>	<i>Period</i>
					at the island side. It is possible that this submerged feature would be visible at low tide.	
NB 1406 3762	Camas Sandig	utilised natural island	Utilised natural island/stac		Located immediatley to the noth of the boat naust site NB 1406 3761, this stack is situated on or around the high water mark of the western shore of Bernera on Camas Sandig. It is linked to the shore by a causeway running north to south that is 11 metres long and 2 metres wide.	Prehistoric /early-historic/me dieval
NB 1431 3769	Tob Valasay	utilised natural island	Utilised natural island		Linking a small natural islet to the west shore of the tidal inlet Tob Valasay this causeway is constructed of boulders and is 10 metres long and upto 2.5 metre wide.	Unknown
NB 1455 3785	Tob Valasay	utilised natural island	Utilised natural island		Situated on a small siland off the west shore of Tob Valasay is a small cellular structure circa 3 metre in diametre. The island is largely bedraock with little soil and is 10 x 9 metres. It is linked to the shore by a submerged possible causeway visble as a line of weed at the surface. This casueway is 15 metres long and is orinetated west north-west to east south-east.	Unknown
NB 1460 3970	Loch na Muilne	utilised natural island	Causewayed natural islet		Situated in the south-western area of Loch na Muilne is an island circa 100 x 50 metres. This island is connected to the southern end of the loch by a causeway which is now submerged and fragmentry in its remains.	Unknown
NB 1836 3397	Tiddaborra	well	Well			Unknown
NB 1800 3445	Cnoc Sgealaval	well	Well			Unknown
NB 1892 3466	Leathad Mor, Kirkibost	well	Modern well			Modern
NB 1846 3478	Kirkibost	well	Well		This feature consists of two vertical slabs capped by a larger irregularly shpaed piece of stone forming the entrance to a well, part of a culvert or the remains of a cist. The feature runs from north to south into a hill slope and is 1 metre wide and (through probing) 2 metres long.	Unknown
NB 1903 3514	Kirkibost	well	Well		This well measures 1 metres in	Post-

<i>NGR, NMRS</i>	<i>Locale</i>	<i>Class</i>	<i>Structure elements</i>	<i>Artefact Elements</i>	<i>Description</i>	<i>Period</i>
					diameter and is constructed in the traditional Lewisian fashion with a linteled entrance to a low cell that pools water from a natural spring.	medieval/p re-crofting/crofting
NB 1879 3593	Kirkibost	well	Well		Located immediatley to the south of blackhouse site NB 1878 3593 is a well constructed of edge set slabs.	Unknown
NB 1455 3656	Valasay	well	Well		This typical lewisian well is a hole in the ground at the end of a shotr culvert that runs from north to south for 1 metre. The hole is 1.1 metres wide and 0.65 metres long and is edged by large stones on its soouth side.	Unknown
NB 1589 3683	Allt Loch Airigh Bhataii, Breacleite	well	Well			Unknown
NB 1459 3686	Valasay	well	Well		Consisting of three edge set slabs this wll measures 0.7 x 0.6 metres and is open on its outh side.	Unknown
NB 1592 3687	Allt Loch Airigh Bhataii, Breacleite	well	Well			Unknown
NB 1414 3810	Tobson	well	Well		Located immediatley to the south of Blackhouse/greyhouse site NB 1414 3811, is a stone built well measuring 1 x 1 metres and formed in a horse shoe shape of flat slabs.	Unknown
NB 1411 3878	Gleann an Toib, Tobson	well	Well			Modern
NB 1534 3957	Croir	well	Well		Measuring 0.7 x 0.6 metres this well is a stone lined box with a single flat stone formin each side	Unknown
NB 1533 3960	Croir	well	Well		Constructed at the foot of a north facing bedrock cliff this well demarks a spring that ponds in a pool 1.6 metres in radius and is man made to allow water collection	Unknown
